of the Warner constellation passives at your discretion

Now onto the actual weapon loadouts!

PRIMARY WEAPON: TWO-HANDED WEAPON (MELEE DPS)

First Skill Slot: Puncturing Strikes (Biting Jabs) – A great opening to any aggressive negotiation, Biting Jabs serves to provide both a powerful single-target and AoE attack. It also grants you a passive 10% critical buff on top of the Piercing Spear passive that provides extra critical damage. Also, each hit can proc the passive Burning Light.

Second Skill Slot: Momentum (Rally) – Invoking the power of the Divines to bolster your own strength, Rally provides you with a much needed buff to your raw Weapon Damage and in turn your overall DPS. It's also a very potent self heal, allowing you to survive a great many dangers you might face.

Third Skill Slot: Reverse Slash (Reverse Slice) – When an enemy gets low enough health, use Reverse Slice to force them to lie down and bleed—and any of their friends in close vicinity, too. Reverse Slice's damage cap is the same as most. If not all execute abilities, but it comes with a handy-dandy AoE attack that has the capability of wiping out multiple enemies in one fell swoop.

Fourth Skill Slot: Backlash (Power Of The Light) – Calling down a ray of the mighty sun's energy, you can single out and weaken an enemy for attack, lowering their armor and turning them into a walking six second time bomb. Can't beat that now, can you?

Fifth Skill Slot: Uppercut (Wrecking Blow) – Wrecking Blow is the bread and butter of the Aedric Warden's attacking method. Weave it with Heavy Attacks to help maintain Stamina longer, and deal a vicious amount of damage to an enemy.

Ultimate: Dawnbreaker (Flawless Dawnbreaker) – A gift from Meridia, the Aedric Warden's sword can channel her energies to summon Dawnbreaker, creating a massive wave of destruction. More importantly, simply having this Ultimate equipped allows you to gain a bonus to your Weapon Damage.

SECONDARY WEAPON: BOW (RANGED DPS)

First Skill Slot: Spear Shards (Blazing Spear) – The skill exists for two purposes. First, it's an attack that does a modest amount of single-target and AoE damage and has a chance to proc the Burning Light passive. Second, and most important, it adds a resource manager for your tank. This is incredibly valuable. It also serves to aid either the healer (who, if a Templar, should be throwing shards or using Repentance regularly) in bolstering your party or melee DPS support should you not have a Templar healer with you.

Second Skill Slot: Expert Hunter (Evil Hunter) – The anatomical and magical study of dark creatures often proves very useful in hunting your enemies down, regardless of whether you hunt them or are one yourself. In this case, a touch of "divine" magic goes a long way, especially for the bow. Bows are made

Womanist and Mujerista Psychologies
Voices of Fire, Acts of Courage

Edited by Thema Bryant-Davis and Lillian Comas-Díaz

This inspiring book introduces the psychologies of womanists and mujeristas—African American women and Latinas, respectively, who have I broad and inclusive approach to feminism and liberation. Womanists and mujeristas value and worldviews emphasize resistance, strength, activism, self-e pression, creativity, spirituality/ connection, self-definition, and liberation of all oppressed people. As opposed to much general psychology literature that pathologizes or margins ized the experiences of African American women and Latinas, this book centralizes their experiences and unpacks the universalizing l ssons of their historical and contemporary ways of knowing and approaches to living. The chapters integrate findings from multiple disciplines to explore psych logy, spirituality, creativity, activism, counsel ng, heal ng, research, and leadership from a womanist and mujerista perspective.

Eliminating Inequities for Women With Disabilities
An Agenda for Health and Wellness

Edited by Diane E. Mazur-Cohen and Caroline S. Erdie

Over 20 million American women and girls have some form of disability, women with disabilities often have difficulty accessing health care services, and the quality of the health care they do receive i often worse than the care received by women without disabilities and men with disabilities. Using an integrated care framework as a foundation, authors in this book tackle ar structural, environmental, and socio barriers that prevent women with disabilities from accessing effective and culturally competent care and services, and offer plans for act on to improve the lives, health promotion, and disease prevention among this broad yet consistently underserved population.

APA Handbook of Sexuality and Psychology
Volume 1: Person-Based Approaches
Volume 2: Contextual Approaches

Editors-in-Chief Deborah L. Tolman and Lisa M. Diamond

Associate Editors José A. Bauermeister, William R. George, Abbey O. Pluhar, and L. Monique Ward

This comprehensive two-volume handbook provides an unparalleling review of current empirical research on sexuality as well as a synthesis of the dominant theoretical perspectives that have guided such research and clinical practice. Ar organizing current throughout the volume is the integration of individual experience and social/ cultural influences across every domain of sexuality. This dual emphasis on person and context is reflected in the structure of the handbook itself.

Volume 1 presents foundational information on the history, theoretical and methodological development, and current practices in the field. It then moves on to address foundational aspects of sexuality, including desire, orientation, behavior, and practices, individual lifespan development, and biological substrates. Volume 2 provides the analytical frame to emphasize the sys em or social factors known to influence the development, expression, and representation of sexuality, as well as its regression in and through all of the key institutions of our society.

1 Mount the camera to a sturdy tripod

2 Position a reference target for the camera to focus on. The reference target should have sufficient contrast for the AF system to read, should be flat and parallel to the camera's focal plane, and should be centered with respect to the picture area

3 Print out either this Sigma Lens Setup Chart or this Focus Test Chart on regular letter size paper. You can print it on a laser printer or inkjet (though I really prefer). Make sure to print on regular paper, not anything glossy like photo paper.

4 Scotch tape or some other adhesive material to keep the focus chart on the wall

5 Lighting should be bright and even.

6 Camera-to-subject distance should be no less than 50 times the focal length of the lens. For a 50mm lens, that would be at least 2.5 meters, or approximately 8.2 feet

7 Set the lens for AF and the camera for One Shot AF, and manually select the center focusing point

8 Shoot at the maximum aperture of the lens via manual mode or aperture-priority AE, and adjust the exposure level if necessary to achieve an accurate exposure of the reference target. Use a low ISO setting to reduce noise

9 If the lens has an image stabilizer, turn it off

10 Use a remote switch and/or the camera's self timer to release the shutter. Use mirror lock as well

11 Take three sets of images at minimum adjustment settings of -5, 0 and +5, i.e. three consecutive images at -5, three consecutive images at 0, and three consecutive images at +5. Then take a review image for comparison

12 Examine the resulting images on your computer monitor at 100% pixel magnification, and compare each image to the live view image.

13 Take additional sets of test images at different micro-adjustment settings if necessary until the sharpest image is achieved and most closely matches the live view image

14 Save the corresponding micro-adjustment settings in the camera.

Here are a few additional precautions to observe:

• Do not attempt to autofocus on an angled chart, because doing so will degrade the consistency of the camera's focusing measurement. Keep in mind that the camera's AF sensor is comprised of multiple pairs of linear pixel arrays. If you attempt to autofocus on a single line in an angled focusing chart, only a few pixels from each active pixel array will "see" the target. Ideally, the contrast in the reference target should cover the entire area of the camera's center focusing point, and the reference target should be perfectly parallel to the camera's focal plane.

• For best results, manually set the focus on the lens to infinity for every exposure before allowing the camera to autofocus the reference target.

• Expect some minor variations in focusing accuracy within each set of three test images, even though they were all taken at the same micro-adjustment setting. This is completely normal, and is due to the tolerances of the camera's AF system.

• Expect smaller micro-adjustment settings to have a greater effect with telephoto lenses, and vice versa for wide-angle lenses.

• If you are attempting to set micro-adjustments for a zoom lens, it is important to realize that the camera's setting may only be accurate for the focal length setting you test. The instruction book suggests testing at the longest focal length of the lens, but you may find it more efficient to choose the focal length you use most often.

• Some cameras and some zoom lenses may require more sophisticated calibration than the in-camera AF micro-adjustment settings can provide. In such cases, it may be necessary to have calibrations performed at a factory Service Center.

Spam Confidence Level Threshold

0 out of 31 rated this helpful

Topic Last Modified: 2015-04-14

In Microsoft Exchange Server 2013, you can define specific actions according to spam confidence level (SCL) thresholds. For example, you can define separate thresholds for rejecting, quarantining, or deleting messages on an Exchange server that's running the Content Filter agent.

The combination of the SCL threshold configuration in the Content Filter agent and the Safe Junk Email folder configuration on the user's computer helps you implement a more comprehensive and granular anti-spam strategy. The more precise and granular SCL threshold adjustment functionality in Exchange 2013 can help you tailor the overall cost of deploying and maintaining an anti-spam solution across your Exchange organization.

The Content Filter agent category on SCL rating in messages lets in the anti-spam cycle, filter other anti-spam agents have processed any inbound messages. Many of the other anti-spam agents that process inbound messages before they're processed by the Content Filter agent are theoretically in how they act on a message. For message on an Edge Transport server the Connection Filter agent rejects any message sent from an IP address on a real-time block list. The Sender Filter agent and Recipient Filter agent process messages in a similarly messages of content

In Exchange 2013, these deterministic anti-spam agents process messages that and generate greatly values, the number of messages that must be processed by the Content Filter agent. For more information about the order in which anti-spam agents process messages, see Anti-spam protection.

Because Content Filtering isn't an exact, deterministic process, the ability to accurately assess the value that the Content Filter agent threshold on different SCL values is important. By carefully adjusting the SCL threshold configuration, you can minimize the following:

0 = not spam

1 - 4 = likely spam

5 - 9 = spam (delete)

- Size of the spam quarantine storage
- Number of legitimate email messages mistakenly quarantined
- Number of legitimate email messages that reach the Microsoft Outlook user's Junk Email folder
- Number of different spam email messages that enter the Outlook user's Safe Junk Email folder
- number of spam email messages that reach the Outlook user's folder

SCL threshold actions

By adjusting SCL threshold actions, you can control the content filtering action taken on messages that have a greater risk of being spam. To understand this functionality, it's helpful to understand the different SCL messages actions and how they're implemented:

SCL delete threshold When the SCL value for a specific message is equal to or higher than the SCL delete threshold, the Content Filter agent deletes the message. There's no protocol-level communication that tells the sending system or sender that the message was deleted. If the SCL value for a message is lower than the SCL delete threshold value the Content Filter agent doesn't delete the message. Instead, the Content Filter agent compares the SCL value to the SCL quarantine messages.

SCL reject messages When the SCL value for a specific message is equal to or higher than the SCL reject threshold, the Content Filter agent delivers the message and sends a rejection message to the sending system. You can messages the sending message. In some cases, a non-delivery report (NDR) is sent to the specific owner of the message. If the SCL value for a message is lower than the SCL delete and SCL reject threshold values, the Content Filter agent doesn't delete or reject the message. Instead, the Content Filter agent compares the SCL value to the SCL quarantine messages.

SCL quarantine threshold When the SCL value for a specific message is equal to or higher than the SCL quarantine threshold, the Content Filter agent sends the message to a quarantine mailbox. Email administrators can periodically review the quarantine mailbox. If the SCL value for a message is lower than the SCL delete, reject, and quarantine messages values, the Content Filter agent doesn't redirect, reject, or quarantine the message. Instead, the Content Filter agent sends the message to the appropriate Mailbox server, unless the per-recipient SCL Junk Email folder threshold values of the messages is exhausted.

SCL Junk Email folder messages In the SCL value for a specific message under the SCL Junk Email folder processed the message is delivered to the user's Junk Email folder if the SCL value for a message is lower than the SCL delete, reject, quarantine, and Junk Email folder threshold values, the message is threshold to the user's folder

The Content Filter agent and the Junk Email folder process the SCL messages value differently. The Content Filter agent takes action on the SCL messages value that you configure. The Junk Email folder takes action on the SCL threshold value that you configure plus 1. For example, if you configure the delete action to an SCL of 6 for the Content Filter agent, all messages with an SCL of 6 or greater are deleted. threshold If you configure the Junk Email folder with an SCL threshold of 4, all messages with an SCL of 5 or greater are sender to the Junk Email folder

For example, if you set the SCL delete threshold to 4, the SCL agent threshold to 7, the SCL quarantine threshold and, and the SCL Junk Email folder messages as 4, a message with an SCL of 5 or lower are threshold in the user's mailbox. Messages sent an SCL value of 5 are put in the user's Junk Email folder Messages sent an SCL value of 4 or lower are put in the user's folder

You can configure the SCL delete, agent quarantine, and Junk Email folder settings in the following locations:

Windows® Fax and Scan

[illegible]

Fax. You can send and receive faxed documents on your computer, without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started

1. [illegible] a phone line to your computer.

   If your computer came with a fax modem, you can use the modem and the phone line that's connected to it. If you're not sure whether your computer has a fax modem, check the documentation that came with your computer.

2. Set up Windows Fax and Scan.

   The first time you start Windows Fax and Scan, a wizard helps you set up your fax account. You'll need to enter information about your fax modem and the fax service you want to use.

To learn more about setting up a fax account, open Windows Fax and Scan, and then, on the toolbar, click Help, and then click Windows Help.

Scan. After you've added a scanner or digital camera, you can preview the image or adjust its settings before you scan it. If you're scanning documents, you can choose a setting for scanning text. You can [illegible] scanned pictures or documents.

To scan a picture

1. Make sure that a scanner or digital camera is connected to your computer and turned on.

2. In the navigation pane, click Scanned Documents or Scanned Pictures.

3. On the toolbar, click **New Scan**.

4. [illegible]

If the scanner or digital camera you're using doesn't appear in the list, it might not be compatible with Windows Fax and Scan. For more information, see the Help and Support documentation.

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it. Just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Fax toy test.

Hello World!

get the boots, the better).

Prepare

Divide Deuteronomy 7:9 into six sections. Print each section on a separate index card. Make two sets of verse cards. Use masking tape to make lines on floor approximately 10 feet (0.9 m) apart. Place cards behind one of the lines.

Team Game

Let's play a game to spell out the word "Joshua." Children stand in a circle. At your signal, all children wearing shoes run to the center of the circle and face other children. Children left in the circle call out the first letter of "Joshua." Children in the center of the circle repeat the letter. Repeat until word has been spelled. Trying to spell the word as quickly as possible. For each round, use a different word ("promises," "courage," etc.) and call out different colors or other categories to determine which children run to the center of the circle.

Bible Verse Game

Children divide into two teams, take off their shoes and line up behind the masking-tape line without cords.

Give the first player on each team a pair of adult-sized hiking boots. At your signal, player puts on hiking boots and makes their way across playing area to get the top card from the team card pile. Player returns to team, takes off boots and gives boots to the next player.

New player puts on boots and takes a turn. Play continues until all the team cards have been retrieved. Then teams race to put cards in verse order.

is the faithful God
of love to a thousand generations
of those who love him and keep his
commands." Deuteronomy 7:9
For Younger Children
"God keeps his promise of love
to those who love and obey him."
God's Promise for Me
God promises that He will
never stop loving us and will
always help us obey Him.

Song

You, or another leader, lead children in singing "Love the Lord," adding motions and/or clapping if desired.

Prayer

Let's see if we can think of someone God loves for every letter of the alphabet. Call out "A." One child or more children call out a name that begins with the letter A. Continue through the alphabet. (Optional: For younger children, write letters and names on large sheet of paper.) Lead children in prayer thanking God for promising to never stop loving us and for always helping us obey Him.

Song

You, or another leader, lead children in singing "It Is Written," adding motions and/or clapping if desired.

Now accepting hate mail, love letters, and postcards with funny jokes. I love greeting cards and really long notes Didntchaknow?! Stamps are fucking fun! I tried collecting some as a kid but that wasn't my thing. I've missed writing. I've missed reading and hearing some familiar voice resonating. Go ahead, put down your phone, and get something off your mind.

Mutual Non-Disclosure Agreement

Travis Kuehl, (the "First Party") and
_____, (the "Second Party"), agree

First Party and Second Party may from time to time disclose to one another certain confidential information or trade secrets generally regarding Subway in Red Lodge, Montana.

First Party and Second Party agree that they shall not disclose the information so conveyed, unless in conformity with this agreement. Both parties shall limit disclosure to their affiliates and employees with a reasonable "need to know" the information, and shall protect the same from disclosure with reasonable diligence.

As to all information which each party claims is confidential, they shall reduce the same to writing prior to disclosure and shall conspicuously mark the same as "confidential" "not to be disclosed" or with other clear indication of its status. If the confidential information which is disclosed is not in written form, for example, a machine or device, the parties shall be required prior to or at the same time that the disclosure is made to provide written notice of the secrecy claimed by the party. The parties agree upon reasonable notice to return the confidential tangible material provided by the other party upon reasonable request.

The obligation of non-disclosure shall terminate when if any of the following occurs:

(a) The confidential information becomes known to the public without the fault of the party receiving disclosure; or

(b) The information is disclosed publicly by the party disclosing, or ,

(c) a period of 15 months passes from the disclosure, or

(d) the information from its status as confidential through no fault of the party receiving disclosure.

In any event, the obligation of non-disclosure shall not apply to information which was known to a party prior to the execution of this agreement.

How Can I Test My Fax Machine?

Just bought up a new fax machine and it's time to open it, plug in, maybe pour a cup of coffee, and then what?

Presumably, you want to test your fax machine by sending a fax with it. There's time to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-888-5555 (a toll-free number at the Empire Station). When it's finished transmitting, print your test fax cover sheet from the How Box — it's a fun web app that gives customers a format to send in their numbers. Within a minute, your fax should appear on the site. (Click the thumbnail to see a large version.)

To test the receive functionality of your fax machine, print your own document by displaying this site into your browser and then faxing it to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and you'll see the test fax.

Steve,

At this time, we are in need of some information from your company within 24 hrs from receipt of this e-mail. Please fill out your information and return to our Accounting Department at accounting@datatechplus.com so we can get you enter your information into our system for prompt payment in the 30 Business Day cycle to you with no delays. We will need your W-9, Company Banking Information (CBI) form and Certificate of Insurance (COI).

Do you prefer ACH Direct Deposit or a live check? We pay via the Web, but if you choose a paper check, that will take additional time (up to 15 days) for your check to be processed and sent via standard e-mail.

DATATECH-PLUS, INC. (DTP) offers Automated Clearing House (ACH) Direct Deposit as a benefit to all our 3099 Employees. Direct Deposit is the safest and most convenient way to be paid when you finish your work with DTP. More than 90 percent of our Vendors receive this benefit from us, as they choose to have the r Vendor Payments deposited electronically in their bank account. They do not have to worry about the mail carrier... or the weather, or about getting to the bank on time. You can relax while your payment goes directly into your account based on our 30-business day payment cycle.

Corporate Policy
Your Purchase Authorization (PA) and matching invoice are required for any payment from DataTech-Plus, Inc. The PA reflects the total charges we show due for the service request completed by your company. Please review the PA and if there is any discrepancies it with the amounts call our dispatching board @ 813 322 3131 Option 1... before submitting the bill invoices must match the PA to be paid, by sending to accounting@datatech-plus.com. Once received by our Accounting Department. They will review and enter into our payment system which will start the 30-business day payment cycle.

Should you have any questions, please feel free to contact me.

Thank you in advance for your prompt return on this matter

CONNECT YOUR HT70X

Connecting the HT70X is easy. Before you begin, please verify the contents of the HT70X package.

EQUIPMENT PACKAGING

The HT70X A/A package contains:

- One HT70X Main Case
- One Universal Power Adapter
- One Ethernet Cable
- One Various Stand (Only on HT702 and HT704 Packages)

CONNECTING THE HT70X

The HT70X is easy to carry out any configuration and easy installation. Configure the HT70X following the different parts in the Configuration section of this manual.

1. Insert a standard RJ11 plug from your telephone into the Phone port and connect the other end to the telephone cable or a standard touch tone analog telephone
2. Insert the Ethernet cable into the internet or LAN port of the HT70X and connect the other end of the Ethernet cable to an uplink port (ie router, switch, etc)
3. Insert the power adapter into the HT70X and connect it to a wall outlet

The HT70X Analog Telephone Adapter is an all-in-one VoIP integrated service device, which provides a flexible, simple and cost effective solution for the service provider migrating VoIP services. The HT70X VoIP features and functions are available using regular analog telephone.

- Medical Testimony. *A new human being comes into existence during the process of fertilization.*
- Prenatal Development. *Growth in the womb is a rapid process. All systems are in place by week eight.*
- Personhood. *It is unjust and inaccurate to classify certain human beings as "non persons."*
- Abortion Procedures. *All abortion methods violate the most basic medical tenet: "Do No Harm."*
- Abortion Pictures. *Abortion is an act of violence against an innocent human being.*
- -- WHY THE LAW SHOULD PROTECT UNBORN CHILDREN --
- The Role of Law. *It is reasonable and necessary for society to outlaw certain "choices".*
- Competing Rights. *The right to not be killed supersedes the right to not be pregnant.*
- Common Objections. *Poverty, rape, disability, or unwantedness, do not morally justify abortion.*
- Systematic Injustice. *Abortion is condemnable for the same reasons that slavery and genocide are.*
- A Future Lost. *Like any act of homicide, abortion steals from its victims the opportunity to live out their future life.*
- -- SECONDARY ARGUMENTS AGAINST ABORTION --
- Abortion and Race. *For decades, abortion has disproportionately targeted minority babies.*
- Abortion and Genocide. *Around the globe, abortion is shrinking the female population at an alarming rate.*
- Abortion for Profit. *Many abortion supporters have a huge financial stake in keeping abortion legal.*
- Post Abortion Syndrome. *Abortion often leaves women with a lifetime of mental anguish.*
- Abortion Risks. *Significant risk factors (like breast cancer) have been associated with abortion.*
- Abortion Alternatives. *Pregnancy care centers help eliminate the financial burden of an unplanned pregnancy.*

Agenda:
It is important for each student to utilize their student agenda. The agenda provides valuable information regarding school policies and consequences for violating those policies. The agenda includes the daily planner where students should copy down assignments for each class. The agenda will be used as a hall pass and may be randomly checked by teachers for a grade. An agenda may be purchased in the school office.

Late work policy
Students may turn in late assignments for 50% credit. The teacher will contact the parent(s) when zeros begin to affect the student's grade. Additionally students with missing assignments will attend periodic lunch study halls.

Tardy:
Team Yale follows the school's tardy policy which can be found in the agenda.

Exiting the classroom during class
Each student will receive two emergency hall passes per quarter which may be used as a locker or restroom pass. The students will receive these passes at the beginning of each quarter, and it is their responsibility to keep up with them. Once used or lost, permission will not be given to leave the classroom except when excused by the front office, or in a true emergency situation.

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The

point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like).

Contrary to popular belief, Lorem Ipsum is not simply random text. It has roots in a piece of classical Latin literature from 45 BC, making it over 2000 years old. Richard McClintock, a Latin professor at Hampden-Sydney College in Virginia, looked up one of the more obscure Latin words, consectetur, from a Lorem Ipsum passage, and going through the cites of the word in classical literature, discovered the undoubtable source. Lorem Ipsum comes from sections 1.10.32 and 1.10.33 of "de Finibus Bonorum et Malorum" (The Extremes of Good and Evil) by Cicero, written in 45 BC. This book is a treatise on the theory of ethics, very popular during the Renaissance. The first line of Lorem Ipsum, "Lorem ipsum dolor sit amet..", comes from a line in section 1.10.32

The standard chunk of Lorem Ipsum used since the 1500s is reproduced below for those interested. Sections 1.10.32 and 1.10.33 from "de Finibus Bonorum et Malorum" by Cicero are also reproduced in their exact original form, accompanied by English versions from the 1914 translation by H. Rackham.

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text. All the Lorem Ipsum generators on the Internet tend to repeat predefined chunks as necessary, making this the first true generator on the Internet. It uses a dictionary of over 200 Latin words, combined with a handful of model sentence structures, to generate Lorem Ipsum which looks reasonable. The generated Lorem Ipsum is therefore always free from repetition, injected humour, or non-characteristic words etc.

SILENT REFLUX* SYMPTOMS

Although most people (s m sand notice only nausea heartburn, there is a growing interest in another form of reflux, which appears mostly laryngitory symptoms. This form of reflux known as supraesophageal reflux d isease (SERD) or laryngopharyngeal reflux (LPR) is caused by acid from the stomach regurgitating into the lp rat, mouth, nasal passages and even the ungs resulting in symptoms such as chronic cough hoarseness sensitiv and throat decay. Supraesophageal reflux can be challenging to diagnose and treat in part because it often goes unrecognized. Therefore, it is often referred to as "silent reflux" (Tsay for the Love of heartburn). Also unlike heartburn-causing reflux, SERD often does not response to antacid medications making mis-ment a challenge.

In an article recently published in *The Journal of Allergy and Clinical Immunology*, Dr Preston Ow, David Scott, and Ronald Ilimen explored the prevalence and timing of SERD and investigated the efficacy of head-of-bed elevation in its treatment.

The authors reviewed charts from over 200 subjects evaluated at Swiftpa Clinic health Sfate in of Allergy Asthma and Immunology who had undergone a specia overnight pH monitoring study to look for acid within the throat. Subjects found to have acid reflux in the throat were close had subjects an wh sit position they were in when reflux was observed they were classified as either upright, lying down, or both. Among patients who su y experienced acid reflux while lying flat, the authors assigned the pH monitor by either elevating the head-of bed by 6 inches. The request pH recordings were then analyzed to determine if this simple lifestyle intervention could prevent acid from reaching the throat.

A total of 236 patients were included and reflux was detected in 113 (48%) of patients. Most patients (86%) exhibited reflux only when lying flat while 42% had reflux regardless of position and a minority (4%) had reflux only when upright. Among 13 of these with reflux only when lying flat, repeat pH monitoring after head-of-bed elevation showed near total elim of reflux in 6 (62%) of the ind viduals.

This study provides new evidence that SERD is a frequent cause of respiratory symptoms and contrary to what was previously thought, most frequently occurs when lying down. It also shows that an inclined of head-of-bed elevation is effective in reducing supine SERD. Further studies confirm that this lifestyle change can improve symptoms. It will be very good news for patients with a disease that is difficult to treat with medication

There are many manifestations fl reflux and the well-recognized symptoms fl patients, and antacidsolicy. The article outlined stomach, eliminat, and oesophagopharyngeal lines of reflux and fl disease additional gastroesophageal reflux disease (GERD) called extra-esoly diet pH cough. Established voice changes, extras, antacids, data sterol and cancer and reflux, has been shown and in though 1 and reflux with gastroesophageal reflux. Figure 2 Unseating the CFC Daughter Card Connectors

Step 6 Gently lift the CFC daughter card with both hands and remove the CFC daughter card from the module.

Step 7 Place the CFC daughter card on an antistatic mat, antistatic foam pad, or in an antistatic bag.

Step 8 Proceed to "Install up to 4 DFC3B or 2 DFC3C Daughter Cards" section on page 23.

Removing the DFC3 Daughter Card

This section contains two DFC3 daughter card removal procedures. The first procedure describes how to remove the DFC3 daughter cards on modules that are not equipped with a stiffener bracket. The second procedure describes how to remove the DFC daughter card from each row (two of the WS-X6748-GE-TX 10/100/1000 ethernet ports in that are equipped with a stiffener bracket.

Note Only some versions of the WS-X6748-GE-TX Ethernet modules are equipped with a stiffener bracket.

15 hr got 3 seconds which is plenty fast for me. I'll go ahead and give the same 1 or higher seconds / reliability which one works the best

I haven't increased the pipelining above the default. I'm just setting it to true and please be sure to ignore that TRIM command above, its not useful.

Mozilla 2? Linux mint 16 Mate (64bit)

very useful. It does work. I have an older computer(Intel pentium dual core at 2.0 GH, what 993 on RAM) and firefox was taking forever to open pages and new tabs. what this tweak now is running way faster than before. thanks a lot =)

Hey, thanks man.. it worked

Good tips -thanks

I'm using Linux Mint 14 and the pipelining.maxrequests parameter is defaulted to 32. I have tried lower values, I also tried setting network.http.pipelining.interval or configuring anything. I have read through some of the posts below I see everything else as per the tutorial, and it is definitely faster - thanks :)

Sweet, tinker with the tweaks - thanks for the post

Thank you soo much for this tutorial!!!

@Vikram Jadumuny
Thanks for the tips

NEW CAR DISCOUNT

New vehicles on the policy could be eligible for this discount. A new vehicle is defined as a private, non-fleet or corporate vehicle of model year 3 years old or less. This discount will be applied to physical damage (comprehensive and/or collision) coverage premiums.

ACCIDENT PREVENTION COURSE CREDIT

A credit applies to the Bodily Injury and Property Damage Liability, Basic Personal Injury Protection and Collision coverages of a vehicle if the principal operator of that vehicle has successfully completed an accident prevention course which is approved by the New York State Department of Motor Vehicles. The certificate of completion must be presented to us to receive the credit. The credit applies for a period of 36 months following completion of the course. To receive the credit at the end of this period, the driver must again complete the course and present the certificate of completion to us. The exact dollar amount of your credit will be shown on your declarations page.

REFUND OF SURCHARGED PREMIUM

GEICO will refund or credit your policy when notified that a surcharge should be removed because of the following circumstances:

1. An accident falls under one of the exceptions previously listed; or
2. A conviction for a chargeable violation is reversed; or
3. A surcharge was levied through mistake, carelessness, misinformation or other error; or
4. A reserve was established but no claim was submitted for a period of three years after the date of the accident, or the statute of limitation in this matter has run and no suit has been filed.

WAIVER OF SURCHARGE

The surcharge for an accident will be waived if all of the following are met:

1. The policyholder has been insured with the Company for five or more years.
2. The surchargeable accident occurred after coverage has been in effect for five or more years.
3. The driver at the time of the loss was age 21 or older; and
4. There has been no other accident under this policy by a driver age 21 or older during the five year period ending 60 days prior to the loss date which either resulted in a surcharge or was waived under this rule.

CONSUMER REPORT NOTICE

We may obtain a consumer report for this policy and also in the future in connection with any policy renewals or renewals.

MULTI TIER RATING PROGRAM DISCLOSURE NOTICE

Government Employees Insurance Company and GEICO General Insurance Company utilize a multi-tier rating program in New York. The term "multi-tier" simply means that there are several pricing levels depending on characteristics of each individual policy.

Your policy declarations page shows the name of the company with which you are insured and this rating tier. Each policy is individually evaluated for the premium it should charge based upon the characteristics of the risk.

Depending on your rating tier, your rate may be higher than that of the New York Automobile Insurance Plan.

At GEICO, we look forward to servicing your insurance needs for many years to come. If you have any questions, you may speak to any GEICO Insurance Counselor at 1-800-841-3000.

Adobe Acrobat PDF Files

Adobe's Portable Document Format (PDF) is a universal file format that preserves all of the fonts, formatting, colours and graphics of any source document, regardless of the application and platform used to create it.

Adobe PDF is an ideal format for electronic document distribution as it overcomes the problems commonly encountered with electronic file sharing.

- *Anyone, anywhere* can open a PDF file. All you need is the free Adobe Acrobat Reader. Recipients of other file formats sometimes can't open files because they don't have the applications used to create the documents.
- PDF files *always print correctly* on any printing device.
- PDF files always display *exactly* as created, regardless of fonts, software and operating systems. Fonts and graphics are not lost due to platform, software and version incompatibilities.
- The free Acrobat Reader is easy to download and can be freely distributed by anyone.
- Compact PDF files are smaller than their source files and download a page at a time for fast display on the Web.

TEST FAX FROM CISCO

faxZERO.com is free and we are using the Freemium model to pay for it. We rely on people like you to support our service. We'd like to remind you that sending a fax to a non-US or Canada number costs $1.99 per page. Sending a fax to your self or someone in the same US or Canada area code is free. Why not send your next fax to your self?

General Instructions

Purpose of form. Use Form 1040 or 1040A to report your income, your claim for exemptions, your claim for standard deduction, your tax liability, and your income tax refund.

Tax law. Enter all required information. If you are married filing a joint return, be sure to enter your spouse's name and social security number in the proper spaces. If you have questions about your tax liability, you may call the Internal Revenue Service for assistance. See page 3 for the telephone number.

Where to file. If you live in the United States, file your return with the Internal Revenue Service Center for your area. Use the envelope provided with your tax package. If you do not have the envelope, see the list below to find the address for your area.

If you live in Alabama, Florida, Georgia, Louisiana, Mississippi, South Carolina, Tennessee, Texas

Internal Revenue Service Center
P.O. Box 1214
Charlotte, NC 28201

If you live in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming

Internal Revenue Service Center
P.O. Box 9941
Ogden, UT 84409

If you live in Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, Wisconsin

Internal Revenue Service Center
Kansas City, MO 64999

If you live in Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia

Internal Revenue Service Center
P.O. Box 1303
Philadelphia, PA 19105

If you live in Puerto Rico (or if you have no legal residence, or principal place of business in any U.S. state), file your return with the Internal Revenue Service Center, Philadelphia, PA 19255.

If you live outside the United States, file your return with the Internal Revenue Service Center, Philadelphia, PA 19255, U.S.A.

When to file. If you file on a calendar year basis, file your return by April 15, 1982. If you file on a fiscal year basis, file your return by the 15th day of the 4th month after the end of your fiscal year. If you have a valid reason for filing after the due date, attach a statement explaining the reason.

Penalties. You may be penalized for late filing, late payment, failure to report all your income, claiming too many exemptions, or substantially underpaying your estimated tax. The penalty for willful tax evasion is a fine of up to $10,000 or imprisonment for up to 5 years, or both.

Privacy Act and Paperwork Reduction Act Notice. We ask for the information on this form to carry out the Internal Revenue laws of the United States. You are required to give us this information. We need it to determine if you have filed your return and paid the correct amount of tax. Sections 6001, 6011, and 6012(a) authorize us to collect this information. You are not required to provide information as to your religious beliefs or as to whether you have made a charitable contribution to a church. Routine uses of this information include giving it to the Department of Justice for civil and criminal litigation, to cities, states, and the District of Columbia for use in administering their tax laws, and to the Department of Energy for use in its energy conservation programs. Providing false information may subject you to penalties. Failure to provide any other information requested on this form may delay the processing of your return or cause us to disallow claimed exemptions.

You are not required to provide the information requested on a form that is subject to the Paperwork Reduction Act unless the form displays a valid OMB control number. Books or records relating to a form or its instructions must be retained as long as their contents may become material in the administration of any Internal Revenue law. Generally, tax returns and return information are confidential, as required by section 6103.

The time needed to complete and file your return will vary depending on individual circumstances. The estimated average time is: Recordkeeping, 12 min.; Learning about the law or the form, 10 min.; Preparing the form, 12 min.; and Copying, assembling, and sending the form to the IRS, 20 min.

If you have comments concerning the accuracy of these time estimates or suggestions for making this form simpler, we would be happy to hear from you. You can write to the Internal Revenue Service, Washington, D.C. 20224. Attention: Tax Forms Coordinator. Or you can write to the Office of Management and Budget, Paperwork Reduction Project (1545-0074), Washington, D.C. 20503. DON'T send the completed form to either address.

If you live outside the United States or your return is for Guam, the Commonwealth of the Northern Mariana Islands, or the Virgin Islands of the U.S., see page 3 of the instructions for Form 1040.

Name and address. Type or print your first name, initial, and last name. If a joint return, give the first names and initials of both you and your spouse. Include your apartment number, route number, or P.O. box number if mail is not delivered to your street address. Please type or print your name and address on Form 1040 when it is filed. If you have a different address when you file your return, be sure to use your current address.

Social security number. If you are married filing a joint return, be sure to enter your spouse's social security number in the proper space. If you do not have a number, you should apply for one. To do so, get Form SS-5 from your local Social Security Office.

Presidential Election Campaign Fund. You may designate $1 of your tax liability to this fund. If you are married filing a joint return, your spouse may also designate $1. Designating $1 will not increase your tax or reduce your refund.

Filing status. Check only one box. If you were married and meet the tests listed under "Married filing joint return," you may check that box even if you did not live with your spouse during the entire year. If you were married and lived apart from your spouse for the entire year, you may choose to file as single or head of household, whichever applies to you. If you were married and lived with your spouse at any time during the year, you may not file as head of household.

Married filing joint return. You may file a joint return if you were married on December 31, 1981, even if you did not live together during the entire year. You may also file a joint return if your spouse died during 1981 and you did not remarry before the end of 1981. You must report the income you received and the deductions you paid or incurred for the entire year. You may use the joint return even if you had no income or deductions to report.

Married filing separate return. If you file a separate return, you must report only your own income, deductions, and exemptions. Your tax may be higher than if you had filed a joint return.

Head of household. If you were unmarried and paid more than half the cost of keeping up a home for yourself and a child or other dependent, you may be able to file as head of household and use the tax rates that are lower than the rates for married persons filing separately. If your child was born alive during 1981, you are considered unmarried for the entire year if you meet the other tests. If your dependent was your father or mother, you must have provided more than half the cost of keeping up their home. You must enter the name of the qualifying person in the space provided.

Qualifying widow(er) with dependent child. You may use this filing status for the two years following the year your spouse died if you have a child or stepchild living with you who qualifies as your dependent. You must have provided more than half the cost of keeping up your home for the entire year.

Exemptions. You are allowed one exemption for yourself unless someone else can claim you as a dependent. If you are married filing a joint return, you are allowed two exemptions. You may claim an exemption for your spouse if your spouse had no income and is not filing a return. You may claim exemptions for your dependents if you provided more than half of their support. Your dependent's gross income must be less than $1,000 unless your dependent is your child and is under age 19 or a student. Dependents must file a return if their gross income was $3,300 or more. You may claim an exemption for a person who died during 1981 if you provided more than half of the person's support for the year.

Age 65 or over. If you were age 65 or over on December 31, 1981, you may claim an additional exemption. If you are married filing a joint return and both you and your spouse were age 65 or over, you may claim two additional exemptions.

Testing Your HP Fax Machine with the HP Fax Tes

Introduction

This document will assist you in testing your HP Fax machine using the **HP Fax Test Service.**

Print this document for easy reference by clicking the **Printable Version** link in the upper right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the directions below.

NOTE: Be sure that your phone numbers are not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing *82 before dialing the toll free number will unblock the Caller ID blocking feature in most areas. Other phone company services can prevent you from receiving a fax, including voice mail, call blocking, or call privacy features.

NOTE: Whenever troubleshooting a fax issue, it is good practice to set the *Automatic Reports* option to *Every Error* before attempting a test fax. This way, even if the send fax fails, an error code will be generated that will guide you in future troubleshooting. This option is available on different panels on different models of the product. *Search Google* for specific steps.

1. Send a one page black and white test fax to 1-866-hpfaxtest (1-866-473-2983).
2. When your fax is received by the HP Test Fax Service, it will generate a return fax to you within five minutes confirming that we received your fax. This verifies that you can both send and receive a fax with your fax machine.

If you do not receive a return fax within 5-7 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

NOTE: The most common cause of failure is that the fax number set in the Fax Header on the machine does not match the number of the phone line connected to the fax. Also, ensure that the fax header contains the full 10 digit telephone number of the fax machine, including the area code.

For more information or assistance, click **Contact HP** at the top of this page.

YOU MAY BE ELIGIBLE FOR REDUCED TELEPHONE RATES

Check YES if you would like DCF to refer you for the "DTE Residential" limit the fact that you receive Food Assistance, Temporary Cash Assistance, or Medicaid or on your household's net annual income is at or below the Lifeline Program. ☐ YES ☐ NO

REPORTING REQUIREMENTS

For all persons Households must report any change in the household, being under waiting list/es. For programs except food assistance households must report changes in who lives in the household, employment, and income. Food assistance households must report all changes by the 10th of the month after the month of the change. Households receiving Work and/or Temporary Cash Assistance must report all changes by the 10th of the month after the month of the change.

IMPORTANT INFORMATION FOR IMMIGRANTS

Applying for or receiving food assistance benefits or Medicaid will not affect your family members' immigration status or ability to get or sponsor relatives' status. Green card holders receiving Temporary Cash Assistance or long-term legal permanent resident alien adult receiving benefits might consider whether applying for benefits will affect their family income.

NOTICE OF PENALTIES – Food Assistance

If you are found guilty by a state or federal court, or an administrative disqualification hearing, or sign a hearing waiver of intentionally making a false or misleading statement, concealing or withholding facts in order to receive or in an attempt to receive food assistance or committing any act that violates the Food Stamp Act, food assistance regulations, or any state statute for purposes of using, transferring, acquiring, or possessing food assistance benefits, you will be disqualified from the food assistance program as follows:

1. Ineligible for 12 months for the first violation, 24 months for the second violation and permanently for the third violation. If you are convicted of trafficking food assistance benefits of $500 or more, you will be disqualified permanently. Trafficking of food assistance benefits includes:
   1. Buying, selling, stealing, or exchanging benefits for cash;
   2. Purchasing firearms, ammunition, explosives, or illegal drugs for benefits;
   3. Selling personal property or other items made to get the client benefits;
   4. Buying or selling with fraud, assistance and item purposely to use the item for another benefit;
   5. Trading cash for items paid for with food assistance benefits.

If you are convicted of these acts, depending on the severity, you may be fined up to $250,000, imprisoned for up to 20 years, or both.

Any person convicted by a state or federal court of making a false/fraud statement which resulted in identity or residency in order to receive food assistance will have to serve a state or federal sentence before they are eligible to participate in the Food Assistance Program for a period of 10 years.

If you are found guilty of a felony involving possession, use/threat use, or conviction for a crime or an attempt to commit a crime which is a felony or is in violation of a condition of probation imposed under a federal or state law you are ineligible for food assistance. This information may be disclosed to other federal and state agencies for criminal investigation and to law enforcement officials for the purpose of apprehending a person fleeing to avoid the law.

If you are found guilty of a drug-trafficking felony on or after 8/22/96 or convicted by a federal, state, or local court of trading firearms, ammunition, or explosives for food assistance benefits, you are ineligible for food assistance.

If you are convicted of using or receiving food assistance benefits in a transaction involving the sale of a controlled substance you will be ineligible 24 months for the first violation and permanently for the second violation.

NOTICE OF PENALTIES – Temporary Cash Assistance

If you intentionally give false information or fail to make a required report in connection to receive Temporary Cash Assistance and are convicted by a state's superior court of any intentional, fraudulent, forgery, or sign a hearing waiver, you may be disqualified for 12 months for the first violation, 24 months for the second violation and permanently for the third violation.

If you are found guilty of a drug-trafficking felony or lied to avoid prosecution, custody or confinement, after conviction for a crime or an attempt to commit a crime which is a felony or is in violation of a condition of probation imposed under a federal or state law, you are ineligible for Temporary Cash Assistance. If you are convicted as a state or federal sentence before they are eligible to participate in the Temporary Cash Assistance program for a period of 10 years.

Helpful Hints

Congratulations on your upcoming wedding!

Our goal is to make ordering your invitations easy and worry free. We understand that your special day is very important. Your invitations under will be classified for making information and for sending that is usually important. We use the finest papers and elegant Thermography (raised printing) in a variety of the most fashion colors. Please visit our website and email or call us with any questions.

Give your Guests a secure number!

When assembling your guest list, you will address a number. Write this number lightly, in pencil, on the back of your response card prior to mailing. If guests forget to write their name on the card, or if you cannot read their writing, you know who is responding.

Why do you send a Response Card?

Response cards are a convenience way for your guests to reply and for you to plan properly. They save you money on your postage cost especially if a meal is being served. By selecting you to keep track of an exact head count. If you are offering a meal choice, this can also be indicated on this card. Response cards include a reply envelope printed with your name and address. Do not forget to affix stamps on the reply envelope

Why is it so important to put your address on the back of the invitation envelope?

Nobody is perfect! Should you have an error on your guest list, the invitation will be returned to you by the post office. Otherwise, you will never know if your invitation arrived. For a reasonable charge, you can have your return address printed on the invitation envelope in a matching ink color and less fancy style when ordered with your invitations.

Our best tip and advice – Check to make sure you are using the correct postage when mailing!

Before addressing your invitations, put together a envelope invitation ensemble with all of your enclosure cards and envelopes. Bring your complete ensemble to your local post office and have them weigh it to determine the proper amount of postage.

Invitations that are over 1 ounce, or square or oversized, require extra postage. If your invitations are returned for insufficient postage, your envelopes will be returned and reducing them with one only save you more money, but will interfere with your time frame. While at the post office ask the postal clerk to show you their beautiful wedding stamps.

Why should I use a Professional when ordering my invitations instead of doing it myself?

An experienced stationery dealer can help you with your decisions and remind you of things you might otherwise overlook. They can also help with wording and appropriate choices, as well as guide you to using lower, elaborate, motifs, monograms, engraved "initial" behind your invitation copy or other ideas to make your invitation unique. There are professionally printed invitations available to fit every budget and can be ready in just a few days.

When you choose to do your invitations yourself, you can locate many hidden expenses: ink cartridges, extra sheets that get cut up, printer jams, envelopes or even purchasing a new printer. More importantly, you need to account for the cost of your time.

When do I order my invitations and how many do I order?

Be sure to have unobstructed details of your ceremony and reception before ordering your invitations. This includes the date, time and the location(s). You should also have an accurate head count. Order your invitations for each single adult, couple or family invited. Order 25 more invitations than you are ordering 25 more or a few date will cost more and may delay sending your invitations.

When do I send out my wedding invitations?

Invitations traditionally are sent 6 to 8 weeks before the wedding. Send a Save the Date card 6 to 8 months before your wedding to verify guests that you are getting married especially if it is during a holiday weekend or if they need to travel. This will provide plenty of notice if travel arrangements and hotel reservations are required.

What Your Workspace Says About You

Have you ever felt like telling off your boss? Most of us have. That's why we can identify with cartoons that make fun of difficult bosses.

But before you cut out one of those cartoons to post by your desk, you may want to give some serious thought to the message you will be communicating to everyone who comes by your workspace.

According to Jo-Ellan Dimitrius, Ph.D, and Mark Mazzarella, co-authors of *Reading People*, workplace props can offer significant clues to an employee's personality, values and level of commitment to the job.

Although most workers have little control over such matters as furniture style or carpet color, many companies allow employees freedom in how they decorate their workspace.

Items such as calendars, photographs and reading materials can say a lot about you because, with so many choices available, they provide an ideal opportunity for individual statement.

It is only natural to want to personalize your office space to show your individuality or to make yourself feel more comfortable or at home. However, it's a good idea to be selective about what you display in your workspace.

While you may not label others based on how they decorate their space, your boss, coworkers, and clients may be making judgments about you. After all, a brilliant day planner or poster of Eminem communicates different messages than a motivational calendar featuring slogans about teamwork and perseverance.

Tasteful photos, artwork and accessories are usually acceptable, while displaying that photo of you and your drunken fraternity brothers mooning the camera is generally not. A collection of beer mugs from your spring break outings, your toe nail slippers and that voodoo doll that looks just like the boss might be interesting conversation pieces; however, these types of "props" in your workspace are unlikely to create confidence in your judgment, discretion and leadership abilities.

Clutter also communicates a message. Says Dimitrius, "A messy, disorganized desk usually points to a messy, disorganized person."

Research conducted at the University of Texas found that not only are workers with messy workspaces less reliable, less efficient and less task oriented than their clean desk counterparts, but that others also perceive messy workers to be inefficient, disorganized and unimaginative.

So even if you see yourself as a creative genius who thrives in a messy environment, chances are your coworkers and company management don't see your desk the same way.

What is acceptable varies from one workplace to another, so take a look at the messages you are communicating through your workspace. You may just decide the best place for that controversial cartoon or accessory is at home.

Address bar — Displays the location of the folder that is currently open

Title bar — Click and drag to move the window

Aero

—To See Through Windows with Aero Peek: Point to the Show Desktop button on the right edge of the taskbar or press < > + <Space>. • To View Open Windows with Aero Peek: Point to the program icon on the taskbar that contains the file or window you want to view. Click the thumbnail preview to view the window. • To Maximize Other Windows with Aero Shake: Click and drag a window's title bar, quickly from side to side. Or press < > + <Home>. • To Compare Windows Side by Side with Aero Snap: Click and drag a window's title bar to the right side of the screen and drag the other window to the left side of the screen. Or press < > + < > and < > + < >. • To Maximize or Open Window with Aero Snap: Click and drag the window's title bar to the top of the screen or drag the bottom border of the window down to the taskbar. Or press < > + < >. • To Flip through Windows with Flip 3D: Press < > + <Tab> continue to hold down the < > key while pressing <Tab> to scroll through the open windows. Aero Peek makes open windows invisible so you can view the gadgets and icons on the desktop.

Jump Lists

• Jump Lists are quick shortcuts to files and commands that a program uses frequently. The items that appear in a jump list change according to the program selected. For example Internet Explorer displays frequently visited pages, Microsoft Word displays frequently opened documents. • To View a Jump List: Right-click an icon on the Windows 7 taskbar. Or click the list arrow next to a program icon in the Start menu. • To Pin a Program to the Taskbar: Open the program you want to pin right-click the program icon on the taskbar and select Pin this program to taskbar from the jump list. ! To Pin an Item to the Jump List: View the program jump list. Right-click the item you want to pin and select Pin to this list. Or point to an item in the jump list and click the Pin to this list button. • To Remove an Item from the Jump List: View the program jump list. Right-click an item that appears in the jump list and select Remove from this list from the contextual menu. Right-click an icon on the taskbar to view the jump list for the program. Items in the jump list that are pinned to the program's jump list will remain. Press < > + <R> to open the Run dialog box.

Personalization

—To Personalize Windows 7 Appearance and Sounds: Right-click the desktop and select Personalize. The Personalization window appears. Click the appropriate links to personalize these settings: Themes – Change menus, icons, background, sounds at once. • Desktop Background – Choose built-in colors and pictures, or use your own. Select more than one picture to start a slide show. • Window Color – Change window color and transparency. Sounds – Change which sounds play when you perform different tasks. • Screen Savers – Adjust what displays and when it appears. • Desktop Icons – Add icons to the desktop, such as Computer and Network. • Mouse Pointers – Change how the pointer looks and acts. • Close buttons.

Gadgets

• To Add Gadgets to the Desktop: Right-click the desktop and select Gadgets from the contextual menu. Double-click the gadget you want to add to the desktop. • To View Gadgets: Press < > + <G>. The gadgets on your desktop appear on top of the windows that are open. —To Remove a Gadget from the Desktop: Point to a gadget and click the Close button that appears. To Download New Gadgets: Right-click the desktop and select Gadgets from the contextual menu. Click the Get more gadgets on line link at the bottom of the window. Click the Desktop gadgets link and click the Download button for the gadget you want to add. • To View a Gadget's Options: Point at the gadget, then click the Options button to view and change settings for that gadget.

Maintenance

—To Defragment your Hard Disk: Open Windows Explorer (click the Start button and select Computer). Right-click the disk you want to defragment and select Properties from the contextual menu. Click the Tools tab and click the Defragment now button. To Use Disk Cleanup to Free Space on Your Hard Drive: Open the Computer window (click the Start button and select Computer), right-click the hard disk, select Properties from the contextual menu and click the Disk Cleanup button. • To Uninstall a Program: Click the Start button and select Control Panel. Click the Uninstall a program link under Programs. Select the program you wish to uninstall from your computer, and click the Uninstall button on the toolbar.

HomeGroup

• To Join a Homegroup: Before you begin, make sure you have the homegroup password. Click the Start button and select Control Panel. Click the Network and Internet link. Click the HomeGroup link and click Join Now. Complete the wizard and enter the homegroup password as prompted. ! To Create a Homegroup: Click the Start button and select Control Panel. Click the Network and Internet link. Click the HomeGroup link and click Create a homegroup. Complete the wizard to create the homegroup.

The Baby in the Manger
(Tune: The Wheels on the Bus)

The cow in the stable went moo-moo-moo,
Moo-moo-moo! Moo-moo-moo.
The cow in the stable went moo-moo-moo,
All through the night.

The hay on the ground went crunch-crunch-crunch,
Crunch-crunch-crunch! Crunch-crunch-crunch.
The hay on the ground went crunch-crunch-crunch,
All through the night.

The Baby in the manger went waa-waa-waa,
Waa-waa-waa! Waa-waa-waa.
The Baby in the manger went waa-waa-waa,
All through the night.

His mother Mary went ssh-ssh-ssh,
Ssh-ssh-ssh! Ssh-ssh-ssh.
His mother Mary went ssh-ssh-ssh,
All through the night.

ELECTRONIC COMMUNICATIONS AGREEMENT

You are entitled by law to receive certain information in writing. This notifies you that we intend to provide this information on paper with your consent to receive it instead electronically.

In this agreement:

- "we," "us," "our," or "BBVA Compass" means Compass Bank (Member FDIC) and its affiliates, including BBVA Compass Insurance Agency, Inc. and BBVA Compass Investment Solutions.
- "you" and "your" means the person giving this consent.
- "Communications" means each disclosure or notice we provide to you in connection with your account or your relationship with us, including the following:

You agree to receive electronic Communications from us.

By accepting this agreement, you agree that the use of electronic signatures in connection with your application for any products or services you obtain from us will be legally binding and enforceable.

You must still provide to us paper documentation when such documentation is required to open your account.

We will provide this same information to you electronically unless you withdraw your consent to receive it electronically.

If you would prefer to receive any of these communications on paper instead of electronically, you may click the "Cancel" button below and withdraw this process.

Frequently Asked Questions

How many watts does it take to power basic items in an average size home?

In a typical home, essential items (refrigerator, furnace, air conditioner, freezer, normal lights) will average 4000-5000 watts of power to run.

What is the difference between rated watts and surge watts?

Rated or running watts are the continuous watts needed to keep items running. Surge or starting watts are extra watts needed for one to two seconds to start motor driven products like a furnace or refrigerator.

Why is only one additional surge watt item used to calculate your total surge watt requirement?

Unlike rated watts, surge watts are only needed during the first few seconds of operation. In these cases, only one item will start in cycle at the same time, therefore this is the most accurate estimate.

What if the wattage I am using is too close to exceeding the generator's capacity?

In this case, we would suggest upgrading to a higher wattage generator. Unnecessarily long wattage could prevent an item from starting or running and in some cases may cause motor damage.

MARK SCHEME for the October/November 2012 series

0500 FIRST LANGUAGE ENGLISH

0500/32 Paper 3 (Directed Writing and Composition), maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

What is the benefit to a solid state hard drive? What is a Solid State Drive

To explain Solid state hard drives, First you will have to understand standard hard drives.

Standard hard drives use internal discs that store data similar to that of a CD or a record but instead of physical bumps it uses magnetic "bumps". These drives have an arm that physically moves and discs or platters that physically spin. When you request to open a file the arm of the hard drive must physically move to the precise location that the data is stored in order to access this. The average hard drive seek time (the time it takes it to seek out data) is .01 seconds Seems pretty fast, huh? What if I told you to start windows, you're actually opening 1000's of files. That .01 seconds is now closer 20 seconds. Considering in that 20 seconds your processor is waiting for the hard drive 40 000,000,000 cycles of the processor have been wasted, it's not very fast

The SSD significantly reduces this seek time to .0001 seconds or 100x faster on average
You will see windows boot in 1/3 to ½ the time of the standard hard drive Applications being opened will appear almost instant
Other improvements include
1/3 power consumption
No spin up time (time for the motor to start the platter spinning)
No alignment latency
No "fragmentation"
No noise
No shock sensitivity
Weight
Not susceptible to mechanical failure
Longer laptop battery life

Cons:
Limited to approximately 10,000 writes
Price ($150 for 120gb vs $40 for 120gb Standard hard drive)

NORTHWESTERN UNIVERSITY

Dear Program Director:

I am pleased to write a strong letter of recommendation for Asia Owais, M.B.B.S. who is applying to your institution for a residency in Obstetrics and Gynecology. My qualifications to write this letter include a 29 year tenure as Head of the Section of Undergraduate Education and Medical Student Affairs in the Department of Obstetrics and Gynecology at Northwestern University. During this time I personally supervised the education of more than 5,000 medical students in our discipline.

Asia graduated from the DOW Medical College in Karachi, Pakistan where she consistently was awarded a grade of distinction in her Obstetric rotations for three years. One of her major impetuses to come to the United States was to continue her education in our specialty, and she is now a permanent U.S. resident with a green card status. Since her arrival she passed Step 1 and the two parts of Step 2 of the USMLE all on the first attempt.

Although there has been an interval between her graduation from medical school and this application the time has represented a positive experience in terms of her medical education. By this I mean that the more recent volunteer experience has brought her into contact with a number of senior clinicians and professors, all of whom served as mentors and assisted her in clearly addressing her objectives.

For example, in her work as a research assistant at the Division of Family Planning of the John H. Stroger Hospital of Cook County, she undertook the rather daunting task of totally re-writing a manuscript that had languished in the section because the more senior staff members were unable to infuse it with interest and readability. In this effort, I served as her mentor and was amazed at how she was able to re-state the plain and simple facts in a manner that made sense and held the reader's interest. This article, *"Self-selection as a screening tool for post-abortal IUD placement in a high-risk population"* is ready for submission and Asia obviously will be listed among the first three authors.

Having read literally hundreds of personal statements throughout my career, I could not help but sit back and re-read Asia's. Here I am not talking about

Hail Mary

Today begins the 90th Anniversary of the apparition of the Virgin of Fatima

When you receive this email say a Hail Mary and ask for a special favor.

"Hail Mary, full of grace. The Lord is with thee. Blessed art thou among women and blessed is the fruit of thy womb, Jesus. Holy Mary, Mother of God, pray for us sinners now and at the hour of our death, Amen." (your request)

Please do not break the Novena , send it to 12 people you think deserve justice, peace, love, health, prosperity and truth. When you are down to nothing, God is up to something. This has been traveling since 5/13/07!

Using the Shortcut Keys

The machine is equipped with three types of shortcut keys on the operation panel. Using these keys will boost your efficiency and productivity. See the e-Manual for more information.

Scan ▶ PC1 / Scan ▶ PC2

Use this shortcut key to scan documents and send the scanned data to a computer.

If a computer and the scan settings are registered from [Shortcut Key Settings] in the Menu, a single press of the shortcut key will save your scans to the computer.

Press the shortcut key ([Scan ▶ PC1] or [Scan ▶ PC2]).

Scanning is completed.

If the shortcut key is pressed for which no settings are registered from [Shortcut Key Settings], you can immediately select a computer and the scan settings, and then save your scans to the computer.

Press the shortcut key ([Scan ▶ PC1] or [Scan ▶ PC2]).

Scanning is completed.

Paper Saving Copy

Use this shortcut key to make 2 on 1 or 4 on 1 copies.

Press the [Start] key, and you can make 2 on 1=2 Sided copies.

The following options are also available for selection.

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ, Our Lord; so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph, I never weary contemplating you and Jesus asleep in your arms. I dare not approach while He reposes near your heart. Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us. Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ. In 1500's it was sent by the Pope to Emperor Charles when he was going into battle.

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle.

Make this prayer known everywhere.

Bishop of Trenton

The Culture of Japan
Have you ever heard of Tanka?

Tanka is a traditional style of Japanese poetry, which is made up of 31 syllables (5-7-5-7-7). To use this style, poets must condense their feelings of love, yearning, admiration and longing for nature and life into subtle nuances and picturesque words. Because they must condense such strong feelings into such short simple forms, the selection of the appropriate Kanji or Hiragana (syllabify alphabet) has become an art from in itself. The more subtle or elegant the words the stronger and more vivid the readers' imagination.

Because of the nature of this style of poetry, and the close ties to the language and culture , Tanka has developed a simple elegant, classical style all its own.

People who read Tanka are free to let their imagination soar. The same Tanka may evoke different

HP Fax Products - Testing Your HP Fax Machine with the HP Fax Test Service

Introduction

This solution will assist you in testing your HP fax machine using the HP Fax Test Service.

Print this solution for easy reference by clicking the **Printable Version** link in the upper right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the directions online

NOTE: Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Removing *67 before dialing the toll free number will unblock the Caller ID blocking feature in most areas. Other phone company services, such as call forwarding, anonymous call rejection, call privacy, or call screening features

NOTE: Whenever troubleshooting a fax issue, the good practice to do is the Automatic Reports option to **Error Only** before attempting a test fax. This way, one of the sent fax Error code will be generated that will guide you in future troubleshooting. This option is available in different places on different product, consult the product User's Guide for specific steps.

1. **Send a one page black and white test fax to 1-866-329-3629 (1-866-473-2863).**
2. **Within your fax is received by the HP Test Fax Service, we will produce a report to you within five minutes confirming that we received your fax. This report that you can both a date and number a fax with your fax machine.**

If you do not receive a return fax within 5-7 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

NOTE: Fax most common issues failure that the fax number put in the Fax Header on the machine does not match the number at the phone line connected to the fax. Also ensure that the fax header contains the full 10-digit telephone number of the fax machine, including the area code.

Business Messages
Service discount depends on business agreement, eligible rate plans, proof of employment or affiliation required. Discount may be modified or discontinued without notice including when you/ employee or affiliation status changes. Discount only applies to the monthly service charges and may take 1-2 billing cycles to appear on bill.

Mobile Share Value Savings

- If you have a Mobile Share Value line with a smartphone on an AT&T Next installment plan or if you bought your phone at full retail price (bought your own phone) or are out of annual contract, you qualify for a monthly Mobile Share Value discount of $25 for that line of service. This discount appears as a credit on your bill.
- If you just upgraded your smartphone to a 2-yr service agreement, this means you will not receive the Mobile Share Value discount of $25 for the line upgraded.
- In order to keep this credit/discount when upgrading phones on AT&T Next installment plan, or buying your own phone, or pay full retail price for the phone.
- Unused data from your monthly plan allowance is rounded up to the nearest MB and carries over for one billing period ("Rollover Data"). Monthly plan data is always consumed before Rollover Data.
- Unused Rollover Data automatically expires after 1 billing period. Any Data Charges incurred by your group or account if terminated. Rollover Data is not redeemable for cash or credit and is not transferable.

General Description of Coverage

ProtectorPlus provides benefits only when the insured's accidental death or accidental dismemberment results directly — and independently from all other causes — from an accidental bodily injury which was unintended, unexpected and unforeseen. See your Certificate/Policy of insurance for a full description of coverage.

Electronic Funds Premium Disclosure

The first premium payment may be more than the monthly premium since the premium from the date of approval until the first of the following month will be added to the first month's payment. This authorization will remain in effect until the financial institution has received and has had reasonable time to act on a written request from you to cancel.

Consumer Protection Disclosures

Insurance products are not deposits or other obligations of or guaranteed by the financial institution or any of its affiliates. Insurance products are not insured by the Federal Deposit Insurance Corporation (FDIC) or any other agency of the United States, the financial institution or any of its affiliates. The financial institution may not condition an extension of credit on either: (1) your purchase of an insurance product from the financial institution or any of its affiliates or (2) your agreement not to obtain, or a prohibition on you from obtaining, an insurance product from an unaffiliated entity. By signing this application you acknowledge your receipt of these disclosures.

Silence Buzzer

The buzzer can be silenced as follows:

- Set the panel to access level 2.
- Press button 4.

The BUZZER SILENCED LED is lit. The buzzer will continue to sound intermittently as a reminder that an abnormal condition exists.

If the panel does not reset on a fault condition is displayed, call the service engineer

Troubleshooting

Problem	Possible cause	Remedial action
Unable to silence alarms	Panel not set to access level 2	Enter access code (2-4 zone panel *514) or use key switch (8 zone panel)
Unable to reset system	Alarms not silenced	Silence alarms before attempting to reset system.
	Panel not set to access level 2	Enter access code (2-4 zone panel *514) or operate key-switch (8 zone panel)
	Alarm condition still present	Remove cause of alarm, e.g. replace broken glass in call point.
Buzzer sounding FAULT LED lit	Fault or abnormal condition	View all zones or LEDs. Call engineer
Buzzer sounding POWER FAULT LED flashing	Mains supply failure	Wait until mains power is restored - if panel does not revert to normal operation call engineer
Buzzer sounding SYSTEM FAULT LED lit	Control panel fault	Call engineer immediately

Adobe Acrobat PDF Files

Adobe® Portable Document Format (PDF) is a universal file format that preserves all of the fonts, formatting, colours and graphics of any source document, regardless of the application and platform used to create it.

Adobe PDF is an ideal format for electronic document distribution as it overcomes the problems commonly encountered with electronic file sharing.

- ***Anyone, anywhere*** can open a PDF file. All you need is the free Adobe Acrobat Reader. Recipients of other file formats sometimes can't open files because they don't have the applications used to create the documents.
- PDF files ***always print correctly*** on any printing device.
- PDF files always display ***exactly*** as created, regardless of fonts, software, and operating systems. Fonts, and graphics are not lost due to platform, software, and version incompatibilities.
- The free Acrobat Reader is easy to download and can be freely distributed by anyone.
- Compact PDF files are smaller than their source files and download a page at a time for fast display on the Web.

Amendment XXII

Passed by Congress March 21, 1947. Ratified February 27, 1951.

SECTION 1

No person shall be elected to the office of the President more than twice, and no person who has held the office of President, or acted as President for more than two years of a term to which some other person was elected President shall be elected to the office of President more than once. But this Article shall not apply to any person holding the office of President when this Article was proposed by Congress, and shall not prevent any person who may be holding the office of President, or acting as President, during the term within which this Article becomes operative from holding the office of President or acting as President during the remainder of such term.

SECTION 2

This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress.

Amendment XXIII

Passed by Congress June 16, 1960. Ratified March 29, 1961.

SECTION 1

The District constituting the seat of Government of the United States shall appoint, in such manner as Congress may direct:

A number of electors of Presidents and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the twelfth article of amendment.

SECTION 2

The Congress shall have power to enforce this article by appropriate legislation.

Amendment XXIV

Passed by Congress August 27, 1962. Ratified January 23, 1964.

SECTION 1

The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax.

SECTION 2

The Congress shall have power to enforce this article by appropriate legislation.

The JEA outage map is designed to help customers know when and where we have outages. For your privacy and security we do not show outages at the household level. The best way to check the status of your individual outage tickets is by logging into jea.com.

Under normal outage circumstances, we provide customers with an estimated time for when power will be restored. But when we encounter widespread outages from severe weather, we will complete a system-wide assessment before we provide estimated restoration times. Therefore you will see no restoral on times on the map currently. The map will continue to be updated every 60 minutes throughout the storm restoration, with estimated restoration times provided once assessments have been made.

Crews are out across our service territory working as quickly and as safely as possible to restore service to all customers.

Call volumes in the JEA call center are high, so we ask all customers to be patient and report and monitor outages online instead.

Stay safe

NOTE: Under normal conditions, this watch will receive radio signals to automatically update the time and calendar. There may be occasions in which the radio signal cannot be received. If a signal cannot be received, the watch will operate normally but not update.

NOTE: After a complete loss of charge or an abnormal display or function is noticed, an ALL RESET PROCEDURE and a POSITIONING CHECK AND CORRECTION is required. Be sure to set the time and date after performing these procedures.

NOTE: The watch features an EL backlight which will illuminate the digital displays. This is activated by pressing the upper right button (B).

Radio Reception

The watch will receive radio signals both automatically and on-demand. Both the time and calendar will update based on the current time zone.

Automatic reception occurs that at 2:00 a.m. and then if needed, at 3:00 a.m. and 4:00 a.m. If the 2:00 a.m. reception signal is successful, subsequent updating will not be activated. The 4:00 a.m. automatic update time may be turn set to an alternate time if so desired.

The "on-demand" feature allows the user to enter the reception mode at their convenience. This is helpful when changing time zones before the automatic update or if an automatic update was not successful.

NOTE: Depending on signal strength, it can take up to 15 minutes to complete the update. During the update process, the watch must not be moved otherwise the transmission signal may be interrupted resulting in an unsuccessful time/calendar update.

For in-depth instructions on the radio reception feature, please refer to your owners guide.

ALL RESET PROCEDURE

❑Pull the crown out one "click" and rotate on the the mode hand points to CHK

❑Pull the crown out another click to the setting position.

❑Press the upper right (B) and lower right (A) buttons down simultaneously for 2 seconds, then release them. All LCD segments on the displays will be highlighted and the hands will move to the 12 o'clock to indicate the ALL RESET or executed.

❑Press the crown in to the closed position. You must now continue with the POSITIONING CHECK AND CORRECTION PROCEDURE.

D-POSITIONING CHECK AND CORRECTION

❑Pull the crown out one "click" and rotate so that the mode hand points to CHK

❑Pull the crown out another click to the setting position. Each hand will move in the D-position set in memory and (0) will show in digital display 2. The second hand on the Citizen Eco-Drive frequency hand is the center of the D-position while all other hands should be pointing straight up (12:00 or 24:00 hours) if all hands point to their respective D-position, press the crown in two clicks to the closed position. If any of the hands do not indicate their current D-position, you will need to continue this procedure.

❑Press and hold the upper right button (B) for two or more seconds, then release. This activates the D-positioning mode. ERA will flash in digital display 2.

❑Turn the crown clockwise or counterclockwise until the upper right indicator hand points to the center of EUR on the frequency hand.

❑Press and release the upper right button (B). The digital display 2 will show UTC. Turn the crown clockwise or counterclockwise until both the UTC hour and minutes hands point to 24.

❑Press and release the upper right button (B). The digital display 2 will show HAS. Turn the crown clockwise or counterclockwise until the hour hand points to 12:00 and the 24-hour hand points to 24.

❑Press and release the upper right button (B). The digital display 2 will show MIN. Turn the crown clockwise or counterclockwise and the minute hand points to 12:00.

❑Press and hold the upper right button (B) for two or more seconds, then release and push the crown in to closed position next to the case. The analog hands will move to the time set in memory and RES will show in digital display 2. You must now set the time either through "on-demand" reception or manually.

ON-DEMAND RADIO RECEPTION

NOTE: On demand radio reception is used after an all reset and may be used when traveling or after an unsuccessful update.

❑Pull the crown out one "click". Turn the crown clockwise or counterclockwise to turn the mode hand to the TIME display

❑Press and release the lower right button (A) or upper right button (B) and a city in your timezone will appear.

❑Simultaneously press and release the lower right button (A) and upper right button (B). The will update digital display 1 and the analog hands to your current time zone.

❑Push the crown in one "click". Press and hold the lower right button (A) for two or more seconds until you hear a beep. The second hand will move to the RX position at 12:00, the charge level/frequency hand will move to the current signal strength, and digital display 1 will show TIME digital display 2 will show RX

Place the watch in a stable position so that it is not moved. It can take up to 15 minutes to complete the update process.

❑Upon detection of a radio signal, the indicator hand will move to indicate the signal strength.

❑If a signal is detected and updating is successful digital display 1 will show the time and the second hand will resume normal function.

❑If no signal is detected, digital display 1 will show "NO" and the second hand will resume normal function. If no signal can be detected, you will need to proceed with manually setting the time.

TO MANUALLY SET THE TIME

NOTE: After receiving a radio signal, the time will automatically update. There may be circumstances however for which you need to manually set the time such as after an all reset or you are in an area that inhibits signal reception.

❑Pull the crown out one click. Rotate the crown clockwise or counterclockwise until the mode hand points to TIME.

❑Press and release either the upper right button (B) or lower right button (A) until a city in your time zone is shown in digital display 1

❑Pull the crown out an additional "click" to activate the time setting function. The second/transmission strength indicator hand will move to 12:00 and RES will flash in digital display 1

❑Press and release the lower right button (A) to activate or deactivate DST/Daylight savings time

❑Press and release the upper right button (B). The seconds will reset to zero in digital display 1. Press and release the lower right button (A) to set the seconds to 0

❑Press and release the upper right button (B). The minutes will flash in digital display 1. Turn the crown clockwise or counterclockwise to set the current minute.

❑Press and release the upper right button (B). The hours will flash in digital display 1. Turn the crown clockwise or counterclockwise to set the current hour.

❑Press and release the upper right button (B). The AM/PM (12 or 24 hour indication will flash in digital display 1. Press and release the lower right button (A) to set 12-hour or 24-hour time.

❑Push the crown in one "click". Simultaneously press and release the lower right button (A) and upper right button (B) until you hear a beep. Digital display 2 will change to the time zone stored in digital display 1 and the analog hands will move to the time or that time zone.

❑Push the crown in one click to the closed position next to the case. This completes setting the time.

For further instructions on setting the calendar and details on the many additional features of the Radio Controlled Skyhawk, please refer to your owners manual or our website at www.citizenwatch.com

You have a very LOW rating on medical related websites!?! This is usually because competitors will do everything they can to ruin your online reputation and drive away any potential clients who search for your name online

We can improve your online reputation by posting positive reviews on major review sites and increase your general rating on sites like healthgrades.com vitals.com or doctorscorecard.com

Having positive reviews on major review sites will drive more patients to choose you as their doctor and will make your name stand up from all of the other competitors

Our services include
- Improving your reputation by posting good reviews,
- Suppressing negative reviews or other links that might damage your reputation, with positive ones which you can control
- Increasing your online popularity by creating websites and offering SEO (Search Engine Optimization) services.

Find out more about how we can improve your image on the internet and drive more patients to you by visiting our website at http://postingonlygoodreviews.com/

You can contact us at makereviews@gmail.com or call us at 512-547-1170

Just Test JG

Start by editing your rc local file Running sudo gedit /etc/rc.local and add the following lines above "exit 0"

```
mkdir -p /dev/cgroup/cpu
mount -t cgroup cgroup /dev/cgroup/cpu -o cpu
mkdir -m 9777 /dev/cgroup/cpu/user
echo "/usr/local/sbin/cgroup clean" > /dev/cgroup/cpu/release_agent
```

Save and exit gedit. Now make it executable

```
sudo chmod +x /etc/rc.local
```

After doing this, edit the .bashrc file found in your home directory (gedit ~/.bashrc) and at the end of this file, add

```
if [ "$PS1" ]; then
   mkdir -m 0700 /dev/cgroup/cpu/user/$$
   echo $$ > /dev/cgroup/cpu/user/$$/tasks
   echo "1" > /dev/cgroup/cpu/user/$$/notify_on_release
fi
```

One last thing. To make sure that cgroups are deleted whenever the last task leaves, run

```
sudo gedit /usr/local/sbin/cgroup_clean
```

And copy paste this

```
#!/bin/sh
rmdir /dev/cgroup/cpu/$*
```

Once again, save the file, exit gedit and make it executable

```
sudo chmod +x /usr/local/sbin/cgroup_clean
```

Done! Restart your computer to apply the changes

Our Father, which art in heaven,
hallowed be thy name,
thy kingdom come,
thy will be done,
on earth as it is in heaven
Give us this day our daily bread
And forgive us our trespasses,
as we forgive them that trespass against us
And lead us not into temptation,
but deliver us from evil
[For thine is the kingdom,
the power, and the glory,
for ever and ever]
Amen

Hurwitz: In 2012 global equity markets have continued to manifest the same risk-on, risk-off behavior seen in 2010 and 2011. While central banks have stepped in to augment markets at certain junctures, recent history suggests it may be getting less effective for the buck as investors increasingly discount such interventions and a plentiful liquidity remains the tonic in the banking system. We contribute to expect bouts of volatility.

Recently, the search for yield income has been reflected in equity markets as investors move money into high dividend payers. As a result, such stocks, at least in the U.S., actually trade at a discount to their broad benchmarks' net yields—their historical average. Further, such stocks may not be as defensive as investors think. High dividend yields can reflect stress. Companies that have been steady dividend payers and have strong prospects to increase it or decrease should be more defensive.

Van Buren: The trend is that there is no trend. Natural market outcomes have been thwarted by policy intervention and largely equities have not been moving based on underlying company fundamentals. Europe has been the cause of much concern and the trend has been largely to sell European equities. As a result valuations relative to U.S. stocks are at record discounts, while many of the companies are in far better shape than the European Union. Europe is home to 12 of the 30 largest companies in the world. In our client portfolios, we have been overweight to the segment of the global equity markets since December and short the euro and/or hedged back to U.S. dollars at the same time. History shows that the most difficult periods often produce the best investing opportunities, and the low valuations provide a margin of safety.

FEMM: *What are some of the biggest issues you find during the manager due diligence process?*

Van Buren: One of the investment risk and the ability of the manager to effectively execute on their investment strategy to address these is the operational due diligence which is more focused on ensuring that adequate controls and procedures are in place. The importance of investor depends somewhat upon the structure of the investment. That said, liquidity terms, especially in these considerations has led in some of the largest investor-manager failures. We review the terms to see if they still comport with the strategy and expectations for how it should perform in a given market and cement side provides you an ability to ask deeper, more insightful questions when performance is outside of expectations.

Shukis: One issue that is arising with greater frequency is succession planning and generational transition. For firms to maintain their effectiveness, it is essential that there is a clear, well-articulated plan for transitioning decision-making and ownership from the founder and this planning is not always in place or well communicated. Assessing the liquidity of portfolio holdings is another important issue—failing to assume one's understand the liquidity of holdings in both normal and stressed conditions. Also, accurately deconstructing historical performance composites for managers that have been implemented in multiple vehicles and separate accounts can be challenging. And in hedge funds, we are concerned with non-standard expenses that are charged to the funds, which in some cases are significant.

NEWS: Scrubby Teams Up with Julianne Moore and PTO Today to Bring Awareness of the Importance of Clean Schools During "We Love Our School" Week from February 14 - February 18.

ADDITIONAL RESOURCES: Video hard copy requests, downloadable MPEG2, contact information and more available at http://multivu.prnewswire.com/mnr/scrubby/45951/press.html

STORY SUMMARY:

Students may get to head home at 3:00 p.m. but teachers aren't always so lucky. On top of planning spelling quizzes and geography lessons, a survey of 1,000 U.S. school teachers found 42 percent admit they quit cleaning to their list of daily duties. As an extension of the Make a Clean Difference campaign started in 2010, Scrubby is launching its "We Love our School" Week as a national initiative, together with school partner PTO Today, to help promote clean, creative learning environments for children across the country.

Scrubby is teaming up with 2011 Golden Globe nominee and mother of two Julianne Moore and dozens of local volunteers to kick off "We Love Our School" Week at a Manhattan public school.

Launched in schools this Valentine's Day, February 14, the cleaning program will mobilize volunteers in 1,000 schools and 2,500 classrooms nationwide through Friday, February 18. PTO Today, as an organization focused on filling on-met school needs through parent-teaching partnerships, has provided their extensive, national database of schools for participation in the clean up effort.

SOUNDBITES:

- Julianne Moore
- Martin Ankerman, P&G spokesperson
- Student/Parent

B-ROLL INCLUDES: ***Exterior shots of school*** Julianne and Martin cleaning classrooms*** greeting kids*** Classroom shots of kids and parents cleaning*** Julianne talking with teachers, parents and kids***

GET YOUR NEW THIN CLIENT SYSTEM UP AND RUNNING

Congratulations—welcome to enhanced security, reduced cost, less risk and a system that's a whole lot easier to manage.

HP ThinPro thin clients help improve productivity with quick deployment of simple, familiar and more reliable computing experiences.

It's easy to get started

This quick-start guide illustrates some of the most common tasks of setting up an HP ThinPro thin client. It is designed to help you get up and running, right out of the box. However, if you have questions, need more information or want to set up a more unique configuration, please refer to the HP ThinPro Administrator Guide at **www.hp.com/support/manuals/thinclients**. Select your thin client and its respective guide under *General Reference*.

LOGGING ON AND GETTING STARTED

The HP ThinPro interface appears when you first turn on the thin client and defaults to User Mode.

User Mode

- Allows restricted rights to subset of access connection creation and control panel applications. Allows restricted rights to subset of access connection creation and control panel applications.

Administrator Mode

- Allows full access to control panel applets, main publication of HP ThinState Capture and Deploy FTP images, etc.
- Defines which connections and connection types are visible when in User Mode and limits users on deleting connections or creating new ones.

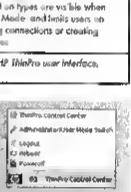
Note: You must log in with administrator permissions to access all components of the HP ThinPro user interface. The default password for Administrator Mode is: root

To switch between User and Administrator mode:

1. Click the HP logo in the bottom left of the screen

or

2. Position your cursor in the screen background and right-click. Then, select **Administrator/User Mode Switch**
3. Enter your password



Quick tip

To determine if you are in User or Administrator mode:

A blue banner at the top of the console window designates User Mode.

A red banner at the top of the console window designates Administrator Mode.

Who should take this course?

Anyone interested in becoming an integral part of a medical team that cares for others. This program is designed to provide the hands-on training needed to become the successful medical assistant professional.

This 600 hour Medical Assistant program offers students hands-on training in clinical and administrative support in a medical facility. Students specialize in both front and back office. Learn techniques and functions to keep healthcare and delivery settings running smoothly.

Course Information Includes:

- Fundamentals in Health Care Delivery
- Medical Terminology for healthcare workers
- Emergencies in the healthcare office
- Clinical procedures
- Administrative procedures
- And more

Note: Students may be subject to fingerprinting and background checks prior to seeking employment as a Medical Assistant.

About Medical Assistants

A Medical Assistant (MA) is an integral member of the health care delivery team qualified by education and experience to work in the administrative office, the examining room and the physician office laboratory. The Medical Assistant, also a liaison between the doctor and the patient, is of vital importance to the success of the medical practice.

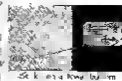
Wireless Security Setup

Please keep for your records.

Your new Wireless DSL Gateway will enable you to take full advantage of some of the newest technologies available today. It is simple to use the wireless networking that has been built into your new Wireless DSL Gateway.

To connect your computing devices to the Wireless Gateway you will need to refer to information located on the bottom of the Wireless Gateway.



Copy the WiFi Protected Access (WPA2) key and Enhanced Service Set Identifier (ESSID) from the sticker on the bottom of the gateway. "MAC ID" is not used for wireless setup. The Wireless Gateway uses WPA2 encryption by default. To use the default setting, your wireless PC must be configured for WPA2 during setup.

The inthalum INRI (Latin: Iēsvs Nazarēnus, Rēx Iūdaeōrum) represents the Latin inscription which in English reads as "Jesus the Nazarene, King of the Jews" and John 19:20 states that this was written in three languages — Aramaic, Latin, and Greek — during the crucifixion of Jesus.

Answer: John 19:19 records: "Pilate had a notice prepared and fastened to the cross. It read: JESUS OF NAZARETH, THE KING OF THE JEWS." John 19:20 continues,

Windows® Fax and Scan

One place to scan and fax your documents

FAX You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax**.

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started:

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, at the bottom of the left pane, click **Scan**.

3. On the toolbar, click **New Scan**.

4. Choose the scan settings you want to use, and you're ready to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scans at any time. For more help with scanning, click the **Help** button on the toolbar.

Documents Stack

Welcome to Mac OS X Leopard

The Dock in Leopard has a sleek new look and a new feature called Stacks. With Stacks, you can quickly access frequently used files right from the Dock.

Stacks are simple to create. Just drag any folder to the right side of the Dock and it becomes a stack. Click a stack, and it springs from the Dock in either a fan or a grid. To open a file in a stack, click the file once.

Mac OS X Leopard includes two premade stacks called Documents and Downloads. You opened this file from the Documents stack. The Documents stack is a great place to keep things like presentations, spreadsheets, and word processing files. You can drag files to the stack or save them to the stack from an application.

Documents **Downloads**

Stacks automatically display their contents in a fan or a grid based on the number of items in the stack. You can also view the stack as a list. If you prefer one style over the other, you can set the stack to always open in that style.

Stacks intelligently show the most relevant items first or you can set the sort order so that the items you care about most always appear at the top of the stack. To customize a stack, position the pointer over the stack icon and hold down the mouse button until a menu appears. Choose the settings you want from the menu.

To remove a file from a stack, just open the stack and drag the item out to where you want it. To delete a file, move it to the Trash. In fact, when you're done reading this document, feel free to throw it out.

ACTIVE PARTICIPATION

Artist Karl Harron has developed an approach that helps to control these slumped forms. When slumping Deep Forms Step Two and Three, observe the slump in action. When unevenness is detected, manipulate the mold to counteract it. Wearing heat-protective gear—gloves, face shield, etc.—reach into the kiln and tilt the mold so the highest point of the glass rim is even higher, encouraging it to slump further and even out the form. Keep the mold from touching exposed elements and thermocouples at all times.

More information on Karl Harron is available at theglassofdiamondland.com

It may be necessary to manipulate the piece many times during the course of the firing. These small adjustments over the course of the slumping process (as often as every few minutes, starting as early as 1100°F) can help achieve an even form. Note that if you are going to manipulate the pieces in this manner you will need to program a much lower process hold time to account for heat loss.

Note: Never insert other objects (metal tools, etc.) into the kiln to perform these adjustments.

DEEP FORM STEP THREE (DF03)

As noted in Step Two, we recommend a fresh application of Bullseye Shelf Primer with each slump firing when using these deep vessel forms.

If you plan to adjust the mold during the firing, support it with either a Drop Out Ring or Ball Surface mold as described in Step 2. Otherwise, elevate on 2" posts.

SUGGESTED FIRING SCHEDULE

	Rate (degrees F / hour)	Temperature	Hold
1	100°F (56°C)	1200°F (649°C)	:30
2	AFAP	900°F (482°C)	1:30
3	75°F (42°C)	70°F (37°C)	:00
4	AFAP	70°F (37°C)	:00

Firing schedules are intended as a starting point. Results may vary.

OBSERVATIONS

- In GL24 kilns, it is not possible to see the bottom of the vessel, so reading the top rim becomes significant. The piece will adequately fit in Stage Three without having reached the bottom of Stage Two.
- Through the slump firings, the glass against the mold can change texture and develop a dry surface. As the walls of the vessel become more vertically oriented they thicken slightly.

ACROSS THE NATIONS THRIFT STORE

OUR MISSION

Across the Nations Thrift Store is a ministry of Across the Nations Ministries, a 501(c)(3) organization. The vision of Across the Nations Thrift Store is to minister the gospel to men of every color and class worldwide. It helps support local churches, churches and missions organizations.

Through gently used donations received from people in the community and sold in our store, Across the Nations Thrift Store and Across the Nations are able to give back to the community in the form of monetary contributions as well as providing local people with an affordable and economical place to shop.

DONATE

Household goods can be donated anytime or by requesting an at-home pick up for furniture and appliances. Please be sure to wash clothes and linens before donating. Monetary contributions can be processed online through Paypal. No matter how you choose to give, rest assured knowing your goods or funds will be wisely received by our organization and used for charitable benefit.

VOLUNTEER

Volunteering can be a rewarding journey for any individual. Giving your time and energy can be just as helpful to others as donating goods or making monetary contributions. Whether you come for an hour or stay for a day, volunteers are welcome and appreciated at our store. Individuals can sign up during retreat hours. Groups please call to schedule and set up a time to volunteer.

Our growing freedom from and control over nature - indeed our survival - rely on a series of stable natural parameters that we tend to take for granted: in temperature, for example, the composition of the air, water and energy supply, and so on. We can "do what we want" only so long as we remain marginal enough. The limits to our freedom become palpable with ecological disturbances, as our ability to transform nature destabilises the basic geological conditions of life on earth.

Crunch Time!

While you're taking in the fresh air, try some fresh ideas in snackin' Chips with health-e merits

YOU'RE ALL SET up for outdoor entertaining, but perhaps you're fresh out of little goodies to serve with drinks and conversation to your guests. Or maybe you're just looking for a healthful snack to munch on while you're relaxing with friends. Either way, Lay's Potato Chips, for example, have 120 calories, 10 grams of fat, and 160 milligrams of sodium in a one-ounce (about 10 crisps) serving—and vegetable chips, on the other hand, can be a little lower in calories, fat, and sodium. Plus many are higher in fiber and protein—and those 4 virtues make them good, too. Our seven of professional nutrition experts tasted 14 brands and found seven that rated high for flavor, fun, and flavor. If you can relate to any of these, you can "eat your chips" serving them at your summer party.

1

Bold and Spicy

For a Snack That Tastes Good Falafel Tortilla Chips. $2, a blend of corn and chickpeas and a little oil, try to make something with cumin, garlic, coriander—the spices often used in falafel, the Middle Eastern, pureed chickpea dish. They have a bit of a kick. One reason: calories—"something simple," said an RD on a new serving (about 1 ounce for all chips), they were also the least expensive to buy in our tests.

PER SERVING 130 calories; 7 g fat (0 g sat fat); 75 mg sodium; 2 grams fiber; 0 grams sugars; 2 grams protein

2

Fiber with Flavor

Your jaw does not know what you're munching on. A handful of **Terra Sea White Bean Chips with Sea Salt** ($4.29, $2.50 with frequent-user discount) convinces you that you're supplying your system with plenty of fiber (5 grams). Not that the thick, brown-speckled, triangular chips are a natural source of fiber—white beans but not black beans—but they're long, mouth-pleasing, and a very good source of fiber.

PER SERVING 140 calories; 7 grams fat; 70 milligrams sodium; 5 grams fiber; 2 grams sugar; 3 grams protein

3

Cinnamon, Anyone?

The cinnamon in **Crunch Master Popped Sea Salt Chips,** $3.25, are a blend of cinnamon and garlic—and it's not the flavors you initially notice but the crunchy chip for dipping that is also tasty on its own.

PER SERVING 120 calories; 5 g fat (0 g sat fat); 290 milligrams sodium; 1 gram fiber; 0 g sugar; 2 grams protein

4

Beyond Kale Chip

Most of us like to eat a chip a great deal, so a very good thing is nutritious, nutritious—a little too good to be true, unfortunately. The **Boston Chip Spinach & Kale Chips,** $3.99, have kinder spinach and kale than our kale, a

of the mild taste and crunchy texture of a Ciabatta roll-out chip. They earned a Good rating for many reasons and a very close rating for flavor, as well.

PER SERVING 140 cals; 7 g fat (0.5 g sat fat); 70 milligrams sodium; 2 grams fiber; 2 grams sugar; 2 grams protein

5

Mixed Vegetables

Good veggies are your thing, consider our entire chips. The two crunchy mixes at **Terra Style** are **Root Vegetable Chips** and **Sea Salt Chips,** $4.59, and **Trader Joe's Vegetable Root Chips,** $3, are a compatible mix of sweet potato, taro, yucca, parsnip, and beets, with a little beet for a added flavor. The Terra chips edged out the Trader Joe's because they have fiber. Earnings by just a hair. They're both also very different sodium content. Added on their nutrition facts labels, Trader Joe's claims that 35 milligrams of salt in a serving. In actual tests, our tasters noticed that they received to be very salty—but no one cared that the sodium quotes out loud chips. The results: The Terra chips averaged a mere teaspoon of salt

claimed. For the Trader Joe's chips averaged 65 milligrams although how the chemist on the label. Both are still moderate. Good to be sure, but even small market would not add and make a difference for people who keep close tabs on their sodium intake.

PER SERVING Terra: 150 calories; 8 g fat; 45 milligrams sodium; 3 grams fiber; 3 grams sugar; 2 grams protein. Trader Joe's: 160 calories; 10 grams fat; 65 milligrams sodium; 2 grams fiber; 2 grams sugar; 2 grams protein

6

Light and Crunchy

Made from green peas and rice, **Calbee Shrimp Chips, Original Lightly Salted** ($1.69), are a crispy cheese puff than chip in texture. Puffs are the lighter and crispy and the one that overall favorite. They are lower in calories, fat, and sodium (whether you use the label's or our grams instead of its milligrams).

PER SERVING 90 calories; 4 g fat; 90 milligrams sodium; 2 grams fiber; 0 grams sugar; 2 grams protein

Informations supplémentaires

Une version électronique du Guide de l'utilisateur est disponible sur l'ordinateur après l'installation du logiciel. Ce guide propose des informations sur les sujets suivants :

- Informations de dépannage
- Informations importantes sur la sécurité et informations réglementaires
- Informations sur les fournitures d'impression prises en charge
- Instructions plus fines d'utilisation de l'imprimante

Vous trouverez également des informations complémentaires sur le site d'assistance HP (www.hp.com/support).

Remarque : Tenez les cartouches non utilisées dans leur emballage jusqu'à ce que vous en ayez besoin. Ne retirez pas la cartouche d'impression de l'imprimante sans raison, car cela réduit sa durée de vie. Si vous devez retirer une cartouche d'impression, remettez-la en place dès que possible pour éviter que l'encre ne sèche. Si vous retirez une cartouche d'impression de l'imprimante et la laissez à l'extérieur pendant une période prolongée, vous risquez d'endommager l'imprimante.

Pour modifier la langue ou paramétrer la commande du périphérique :

1. Sur le panneau de commande du périphérique, appuyez sur **Configurer**.
2. Sélectionnez **Préférences**, puis **Sélectionner la langue et le pays ou la région**.
3. Utilisez les touches fléchées ou numérotées pour sélectionner votre langue et votre situation géographique.

Información adicional

Una versión electrónica de la Guía del usuario está disponible en su equipo después de que instale el software. Esta guía proporciona información sobre los temas siguientes:

- Información sobre solución de problemas
- Avisos de seguridad importantes e información reglamentaria
- Información acerca de los suministros de impresión admitidos.
- Instrucciones detalladas para el usuario

Puede obtener más información en el sitio Web de asistencia de HP (www.hp.com/support).

Nota: La tinta de los cartuchos se usa en el proceso de impresión de diversas formas, que incluyen el proceso de inicialización, donde se prepara el dispositivo y los cartuchos para la impresión y el servicio de los cabezales de impresión, que mantiene los inyectores de tinta despejados y permite que la tinta fluya sin problemas. Además, se deja un poco de tinta residual en el cartucho después de su uso. Para obtener más información, consulte la página Web www.hp.com/go/inkusage.

Para cambiar el idioma del panel de control del dispositivo:

1. En el panel de control del dispositivo, pulse **Configurar**.
2. Seleccione **Preferencias** y, a continuación seleccione **Definir idioma y país/región**.
3. Utilice las teclas numéricas y de flecha para seleccionar su idioma y ubicación.

Tip: the right one judges that folks name faxed us monthly. Click any thumbnail to see the faxer's website and rate it for interestingness.

You can fax something interesting to 1-888-877 1685 (your boss will never notice maybe) and it should appear here within a couple of min. (It's a toll-free number if you're in the USA.) Keep it clean & legal.

Fax single-page documents with no cover sheet. If you fax more than one page, only the last page will appear here. We try to crop off the top few pixels of the page where your company name and fax number should appear... but there's no promise that this will actually work.

The Lost Poem

I Love My Job!

I love my job. I love my pay!
I love it when we have a sick day.
I love my balls. I love the bat!
I love his face one-half the size

I love my office and its carpet. I love to go on vacation.
I love my furniture, files and piles of paper that grow each day.
I love my pit vs. party switch, there's nothing I'd love as well
I love to work among my peers. I love their fears, doubts and sneers.
I love my computer and its software.
I hug it when it crashes and I curse it when it's working fine.
I'd love these words if they weren't cliché.

I am happy to be here. I am.
I'm the happiest slave of the Fuhrer I am.
I love this work. I love these hours.
I love the meetings with deadly bores.
I love my job. I'll say it again. I even love having it when I'm
My wife fourth man down, now today.
I'll clean white coats to have my wealth.

RE: Test

The United States (SPY) and China (FXI) are top crude oil consumers and account for 2.9% and 1.1%, respectively, of the world's total proven crude oil reserves. Occidental Petroleum (OXY) is a US-based integrated energy company.

CNOOC (CEO), China Petroleum & Chemical Corporation (SNP), and PetroChina (PTR) represent the large-cap (large capitalization) Chinese American depositary receipts in the oil and gas sector.

In the next part, we'll talk about Saudi Arabia's fiscal deficit and the strategy it's implementing to stabilize

To change the overall look of your document, choose new Theme elements on the Page Layout tab. To change the looks available in the Quick Style gallery, use the Change Current Quick Style Set command. On the Theme gallery and the Quick Styles gallery, provide reset commands so that you can always restore the look of your document to the original contained in your current template. On the Insert tab, the galleries include items that are designed to coordinate with the overall look of your document. You can use these galleries to insert tables, headers, footers, lists, cover pages, and other document building blocks. When you create pictures, charts, or diagrams, they also coordinate with your current document look.

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires O St Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ Our Lord, so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers O St. Joseph I never weary contemplating you and Jesus asleep in your arms I dare not approach while He reposes near your heart Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us Amen

Say for nine consecutive mornings for anything you may desire It has seldom been known

to foil.

This prayer was found in the fiftieth year of Our Lord Jesus Christ In 1500's it was sent by the Pope to Emperor Charles when he was going into battle

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle

Make this prayer known everywhere

Imprimatur

Testing El Cordova Fax

prove this point. That is far from Jim's most eye popping options move.

PRA Group – which stands for Portfolio Recovery Associates – was, and is, a debt collection company. Back in August 2011, after carefully examining his research notes on this business, Jim was confident that this company was perfectly positioned for his strategy.

He knew that by selling puts on its stock, he would either make a Foolish pile of instant cash... or have the opportunity to buy its shares later at a ridiculously low price.

So on Aug. 9, 2011, with the stock trading at $68.51, Jim recommended that *Motley Fool Options (IO)* members SELL the December 2011 $65 puts. And as long as the stock did not drop below $65 they would keep all the income.

So how did Jim's recommendation do?

He closed the position in December right before expiration, locking in $274 of income for every contract sold.

- ✓ **If you had sold just three of these put contracts when Jim Gillies recommended them, you would have pocketed $1,122 in income.**

But Jim wasn't done yet. There was still plenty more income to scoop up. So in January 2012 he told *Motley Fool Options (IO)* members to sell the June 2012 puts and collect $380 per contract.

- ✓ **Again, if you had sold three put contracts when we recommended them, you would have made $1,140 in income when the options expired worthless.** That just means that the buyer would walk away with nothing. With YOU the seller keeping all the income.

Then in June 2012, Jim alerted *Motley Fool Options (IO)* members to an opportunity to sell the September puts and collect $350 per contract.

If you had sold three contracts again, you would have cleared another $960 in income when the options again expired worthless.

- ✓ **That's a total of $3,226 in extra income... from just one stock... by adding a few simple options moves.**

So you might be wondering:

If it's so easy to make that kind of income, why don't more people do it?

Well, the simple answer is that they're afraid they'll end up owning the shares.

Even utterly frightening!

The way we look at it, that's like being afraid a super model will kiss you on the lips.

You see, with put selling, if the stock drops dramatically you end up buying the shares at the strike price you agreed to when you sold the option (*not* you get them at the current price). Because the put options paid you the instant you made your first move, so you've got basis on the stocks set lower than the strike price).

And that's the big mistake that most people make with put selling. And lots of other options strategies too.

They do it on stocks that they don't understand, and that they would never want to own.

That's not Foolish. In fact, it's just plain stupid.

But it helps explain how Jim has compiled that 82% profit history.

(EIA/TIA 658A)

Cross Over Cable Wiring
Wire ONE End using 568B and one end as follows (Swap Orange and Green Pairs):

PIN	Wire Color
1	White w/Green Stripe
2	Green w/White Stripe
3	White w/Orange Stripe
4	Blue w/White Stripe
5	White w/Blue Stripe
6	Orange w/White Stripe
7	White w/Brown Stripe
8	Brown w/White Stripe

STEP 1 Cut the outer jacket of the wire about 1.5" to 2" from the end. This will give you room to work with the wire pairs. Separate the pairs and align them in the order shown below. Begin flattening the wires into a "ribbon" as shown so that it will easily slip into the connector and into the individual channeled areas.

STEP 2 Once you have all the wires aligned and ready to insert, you must trim them to approximately 1/2" in order to have as little "untwisted" wire in the connection as possible. Category 5 specifications require a certain number of twists per inch and even the connector counts!

Hail Mary

Today begins the 90th Anniversary of the apparition of the Virgin of Fatima

When you receive this email say a Hail Mary and ask for a special favor

"Hail Mary, full of grace. The Lord is with thee Blessed art thou among women and blessed is the fruit of thy womb, Jesus. Holy Mary, Mother of God, pray for us sinners, now and at the hour of our death, Amen." (your request)

Please do not break the Novena , send it to 12 people you think deserve justice, peace, love, health, prosperity and truth When you are down to nothing, God is up to something This has been traveling since 5/13/07!

Writing the Summary

When writing the summary there are three main requirements.

1. The summary should cover the original as a whole.
2. The material should be presented in a neutral fashion
3. The summary should be a condensed version of the material presented in your own words

* * Also do not include anything that does not appear in the original. (Do not include your own comments or evaluation)
and
Be sure to identify your source

For example

In his paper "Global Implications of Patent Law Variation," Koji Suzuki (1991) states that lack of consistency in the world's patent laws is a serious problem. In most of the world patent ownership is given to the inventor that is first to file for a patent However the United States maintains a first to invent policy In view of this patent ownership can change depending on the country Multiple patent ownership can result in economic problems however most striking is the international tension it causes The fact that the United States does not recognize patent ownership in other countries, in violation of the Paris Convention on Industrial Properties, has prompted the World Intellectual Properties Organization (WIPO) to push the United States to review its existing patent law principles.

MANDARIN SKIN PLUS

THE NATURAL SOLUTION FOR LIFELONG GUT HEALTH

RELIEVE. REPAIR. RESTORE.

NEW AT **Rexall**

VISIT MSPLUS.CA for more info

SYMPTOMS TREATED

GLUTEN SENSITIVITY | DIARRHEA | BLOATING | ACID INDIGESTION | NAUSEA | VOMITING | UPSET STOMACH

DOSAGE & EFFICACY

MS+™ users can experience relief in as little as a few hours for mild gastrointestinal discomfort while alleviation of chronic symptoms can take up to 60 days. The normal dosage is 1 caps. le taken orally twice a day – though some users find optimal relief incr easing this dosage me l to exceed 6 capsules a day.

ARE YOU BEING ASKED ABOUT LEAKY GUT?

Leaky gut s a emerging n ll sign l. a cc. n the medical community defined as intestinal hyper permeability caused by stressors of the gut lining. diet, lifestyle and genetics can all contribute.

RECOMMEND MS+ ™ TO PATIENTS:

- W h gastro ntest n l issu fo og and/or an irritable bowel
- Want og an effective alternative or complement to probiotics
- Desiring a natu al treatment that provides more than a temporary fix
- Seeking relief, repair and long-term restoration of gut health

HOW MS+™ HEALS STRESSED GUT

The human gut lining can be damaged by gluten, alcohol, and other stressors. As a result, the junctions between the cells become "leaky." Toxins, undigested food particles, and other irritants can now leak through the gut lining into the bloodstream. The immune system reacts with inflammation, causing pain and discomfort.

MS+™ rebuilds the infrastructure of the gut from the ground up to welcome back the good bacteria and restore normal gut health. MS+™ is a comprehensive solution for a stressed gut. While many products can offer some relief, the effects may be temporary, or not all symptoms are addressed due to the product acting in only one small region of the digestive tract (i.e. probiotics, digestive enzymes).

A CLEAN AND EASY SOLUTION

- Medicinal Ingredient: 97% *Citrus reticulata* pericarp extract (2:1)
- Not contraindicated with any other medications
- Alkaline – does not cause irritation in those who are sensitive to the acidity of citrus products

HOW TO TAKE MS+

IDEALLY TAKE ONE OR TWO CAPS 15 MINUTES BEFORE A MEAL OR WHENEVER DISCOMFORT STRIKES

Swallow one capsule directly

OR

Open the capsule and empty the powder into a bottle of cold water and shake well. Rinse out bottle with water as well. DRINK AND ENJOY. ALSO GREAT IN SMOOTHIES

HOW DOES IT WORK?

- A 4,950 powerful antioxidant
- Decreases inflammation of the immune system
- Actively repairs gut lining "tight junctions"

Bacon & Guacamole Sammies

Don't these bacon and guacamole sammies look good? Filbomb noshed on them while I slept

The ingredients.

- 4 strips of thick-cut pastured bacon
- Guacamole

It's ridiculously easy to cook bacon in the microwave oven. (Clean-up is simple, too.) Just wrap a few slices between some sheets of paper towel, stick it all on a microwave-safe plate, and nuke away. I set my microwave at 70% power and zapped the bacon for about two-and-a-half minutes. If you find that your bacon is not yet crisp, just nuke it a bit longer.

The filling for these sandwiches? Chunky homemade guacamole. If you're pressed for time, simply mash up the pulp of half an avocado, and cut up the other half into half-inch cubes. Then mix both halves together in a bowl to get a nice blend of chunky n creamy. Flavor it with a squirt or two of lime juice and a generous pinch of Kosher salt.

Done and done!

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it, just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero; this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

NO. CUSTOMERS	11901		

1. Load your original print-side down on the right front corner of the scanner glass or print-side up in the Automatic Document Feeder (ADF)
2. From the Home screen on the printer display, press the **Up** and **Down** buttons to select **Fax**, and then press **OK**
3. Select **Black Fax** or **Color Fax**.
4. Enter the fax number by using the keypad, and then press **OK**.

   Tip: To add a pause in the fax number, press * repeatedly, until a dash (-) appears on the display

If the recipient reports problems with the quality of the fax you send, try changing the resolution or contrast of your fax.

1. Dial the number by using the keypad on the extension phone.

   Note: Do not use the keypad on the printer control panel when sending a fax using this method.
2. If the recipient answers the phone, you can engage in a conversation before sending the fax.

   Note: If a fax machine answers the call, you will hear fax tones from the receiving fax machine.
3. Load your original print-side down on the right front corner of the scanner glass or print-side up in the ADF
4. From the Home screen on the printer display, press the **Up** and **Down** buttons to select **Fax**, and then press **OK**.
5. When you are ready to send the fax, press **OK**, select **Send Now Fax**, and then select **Black Fax** or **Color Fax**.

If you were on the phone with the recipient, ask the recipient to start receiving the fax when they hear fax tones on the fax machine. When the printer begins faxing, you can hang up the phone or remain on the line. You might not hear fax tones during fax transmission.

For more information about other ways you can send faxes, such as scheduling a fax to be sent later or sending faxes from a computer, see the electronic Help.

By default, the printer automatically answers incoming calls and receives faxes.

To receive faxes manually, turn off **Auto Answer** from the printer control panel.

The printer will answer calls after the number of rings specified in the **Rings to Answer** setting.

Note: If an answering machine is connected to the printer, the **Rings to Answer** setting for the printer must be set to a higher number than the answering machine.

1. Make sure the printer is turned on and paper is loaded.
2. From the Home screen on the printer display, press the **Up** and **Down** buttons to select **Fax**, and then press **OK**.
3. Select **Settings**, and then select **Auto Answer**, and then select **On**.

   Notes: If you have subscribed to a voice mail service on the same phone line that you will use for faxing, you cannot receive faxes automatically. You must be available to respond in person to incoming fax calls. (If you want to receive faxes automatically, contact your phone company to subscribe to a distinctive ring service or to obtain a separate phone line for faxing.)

   Tip: The printer can store received faxes in its internal memory. To reprint these faxes, see "Reprint received faxes from memory" on the next page.

American Mathematics Competitions

66th Annual

AMC 12 A

American Mathematics Contest 12 A

Tuesday, February 3, 2015

INSTRUCTIONS

1. DO NOT OPEN THIS BOOKLET UNTIL YOU ARE TOLD TO DO SO.
2. This is a 25-question, multiple-choice test. Each question is followed by answers marked A, B, C, D and E. Only one of these is correct.
3. Mark your answer to each problem on the AMC 12 Answer Form with a #2 pencil. Check that the shaded circle for each entry and each response is dark enough and that no stray marks appear. Only answers properly recorded on the answer form will be graded.
4. SCORING: You will receive 6 points for each correct answer, 1.5 points for each problem left unanswered, and 0 points for each incorrect answer.
5. No calculators, rulers, protractors, or drawing instruments are permitted. No materials may be placed on the desktop or table except pencils, erasers, answer sheets, and writing utensils.
6. Figures are not necessarily drawn to scale.
7. Before beginning, fill in your personal data and read the directions on the answer sheet.
8. When you finish, please sign the original and your name on the cover sheet. You will be allowed to keep only this booklet and your own copy of your answers.
9. Wait for the start of the contest before you open this booklet and begin to work.

The Committee on the American Mathematics Competitions (CAMC) reserves the right to disqualify any contestant suspected of cheating. Cheating includes, but is not limited to, copying from another contestant, using notes during the test, and discussing problems with anyone during the test. Scores may be withheld if the CAMC believes that cheating has occurred. Such scores will be withheld if a contestant refuses to cooperate in the investigation of cheating.

Your answer sheet will be graded by machine. Be sure to use a #2 pencil and to fill in the circle completely for each answer. Erase completely any answer you wish to change. Only one answer per problem will be graded. If you mark more than one answer, no credit will be given for that problem.

Your score will be based solely on the number of correct answers within the 75-minute time limit. There will be no partial credit. Your answer must be entered on the answer sheet by the end of the test.

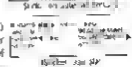
Wireless Security Setup

Please keep for your records.

Your new Actiontec DSL Gateway will enable you to take full advantage of some of the newest technologies available today. It is simple to use the wireless network security features built into your new Wireless DSL Gateway.

To connect your computing devices to the Wireless Gateway you will need to refer to the information located on the bottom of the Wireless DSL Gateway.



Here the WiFi Protected Access2 (WPA2) Key and Enhanced Service Set Identifier (ESSID) from the sticker on the bottom of the Gateway. MAC ID is not required for wireless settings. The Wireless Gateway uses WPA2 encryption by default. To use the default setting, your wireless PC must be configured for WPA2 during setup.

Attend what?

On the night before he died, Jesus met with his apostles. At that time, he introduced a simple ceremony and he told them: "Keep doing this in remembrance of me." They were to do so in remembrance of the sacrifice he was about to make in behalf of mankind.—Luke 22:19, 20.

Last year, in obedience to Jesus' command, almost 20 million people worldwide observed this annual event. What about this year? The Memorial of Christ's death will be held on **Friday, April 3, 2015**, after sundown. Jehovah's Witnesses warmly invite you to be present with them on this important occasion. You will learn how Jesus' life and death can benefit you personally.

The local congregation of Jehovah's Witnesses will meet at the time and place shown below.

The Reviews Are In

Reading and watching and listening on the Fire HD is sublime.

— Gizmodo

"The screen is **bright, brilliant** and graphics are **crisp** and **smooth**" — Mashable

"The Fire HD's speakers are the most **eye-bleedingly awesome** tablet speakers you've ever heard" — CNET

"It boasts **amazing Wi-Fi connectivity**... perhaps the best so far in any device I have either owned or tried" — Gigaom

"It offers a lot for the money: It's **full of ambitious features**, it provides **super-convenient** inputs to a **never-ending trove of content**" — Time

Breakthrough Hardware Technology

Most advanced 7" display

When it comes to HD displays, great resolution is just the start. Unlike other tablets, Kindle Fire HD delivers rich color and deep contrast from every angle with an advanced polarizing filter and custom anti-glare technology.

High Definition Touchscreen Display

Rich, HD video. Beautiful, vivid photos. Crisp, detailed text. Kindle Fire HD features a new 1280x800 high definition LCD display that brings your content to life.

Reduced Screen Glare

Most tablet displays are made up of two pieces of glass: an LCD on the bottom and a touch sensor on the top, separated by an air gap. With an air gap, light reflects off of every surface as it passes through from the front, creating multiple distracting reflections that reduce display clarity. Kindle Fire HD solves this air gap problem by laminating the touch sensor and the LCD together into a single layer of glass, making a display that's easy to view even in overhead light.

Richer Colors at Wider Angles

Like many tablets, Kindle Fire HD is Pixel Switching (IPS) to improve color reproduction. But displays that use IPS still appear washed out at certain angles. Such as text always when in bed, laid flat on a table, or held by you and a friend while sharing a movie. Kindle Fire HD addresses this issue by applying an advanced polarizing filter directly to the LCD panel. The result is a display that shows the same deep, vivid, and rich, detailed color when viewed from any angle.

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ, Our Lord, so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph, I never weary contemplating you and Jesus asleep in your arms. I dare not approach while He reposes near your heart. Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us. Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ. In 1500's it was sent by the Pope to Emperor Charles when he was going into battle.

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle.

Make this prayer known everywhere.

Business name, if different from above

Check appropriate box: ☐ Individual/Sole proprietor ☐ Corporation ☐ Partnership
☐ Limited liability company. Enter the tax classification (D=disregarded entity, C=corporation, P=partnership) ▶
☐ Other (see instructions) ▶

☐ Exempt payee

Address (number, street, and apt. or suite no.)

Requester's name and address (optional)

City, state, and ZIP code

List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on Line 1 to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. See the instructions on page 4.

Sign Here Signature of U.S. person ▶ Date ▶

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

The person who gives Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States is in the following cases:

- The U.S. owner of a disregarded entity and not the entity

READ THIS FIRST

Before you call and before you do the final examination please read these instructions carefully. This will save time for you and us.

Your package should include a book that is divided into 7 chapters, an evaluation form, answer sheet and a 168 question test. If anything is missing, please call us so that we can send the missing item to you.

The phone number for faxing us your test is (661) 633-2119. The fax is on 24/7. You don't need to call us to let us know you are faxing your test. You don't need a cover page. You can also mail your test to us at the address above. Please either fax your test or mail it. Do not fax and mail your test to us, this will delay processing of your test. If you want to check with us to make sure we received your fax, please call us 24 hours after faxing your test. Your fax will not appear on our system until after 24 hours. If you mail your test to us give us at least 5 days after mailing your test before calling us.

Use the enclosed materials to complete all parts of the test. Read all the answers to a question before deciding on the correct answer.

You need to correctly answer 70% to complete your continuing education. We suggest that you don't try to complete it in one sitting. If you don't know the answer to a question and can't find the answer, skip it and come back to it later. Remember, you will not flunk this test just because you don't know the answer to a few questions. Read each question and all answers thoroughly before answering the questions. Take your time completing the test and good luck!

Mr Hansen

Thanks you for [illegible] landscaping in your new divisional headquarters We're [illegible] prop- salsherewith for the concept phase as agreed earlier

Since your available area is somewhat limited, we suggest a modular layout This concept emphasizes space conservation and yet still provides for a modern pleasing atmosphere

Enclosed are two floor plans The first one will allow you to keep your present furniture The second was designed with the intention that our new space-saving modules be used. Notice that the latter will provide for more spacious accommodations and/or room for additional personnel Also included are the specification sheets on these products

After you have had a chance to study our ideas I would like to set up a meeting during October to discuss any further refinements I will have my secretary make the arrangements Please call me in the interim if you have any questions.

amazon

Dear Mike,

I'm writing you this letter because you are an Amazon Prime member who has not yet used any of the video benefits that you've already paid for. Unlimited instant video streaming is included as part of your Prime membership.

You can watch **Prime Instant Video** on your television and on the go on hundreds of compatible devices that you may already own, including:

Video Game Consoles – PlayStation, Xbox, Wii
Set Top Boxes – Roku, Amazon Fire TV
Smart TVs & Blu-Ray Players – Samsung, Sony, LG, VIZIO, Panasonic
Mobile Devices – iPad, iPhone, Kindle Fire, Android Phones

Getting started is easy. Find the Amazon Instant Video app by using your device's search feature, download and sign in with your Amazon account. Or go to **www.amazon.com/watchnow** to get simple set up instructions.

That's all there is to it. And once you're there, you can choose from thousands of videos, including recent blockbuster movies like *Wreck-It Ralph*, *Star Trek Into Darkness*, *Skyfall*, *The Hunger Games: Catching Fire*, as well as hit TV shows like *Suits* and *Arrow*, plus the *Hit Blood Wax*. You also get "Prime Only" subscription-streaming exclusives like *Downton Abbey*, *Under the Dome*, *Dora The Explorer*, *SpongeBob SquarePants*, *Orphan Black*, *Chimerica*, *Extant*, as well as original content from Amazon Studios including *Alpha House* starring John Goodman.

Plus, we now have a selection of award-winning HBO movies including *The Sopranos*, *The Wire*, *Rome*, *True Blood* and *Boardwalk Empire*. Just pick anything you want to watch. For me instant video is fully unlimited and there's no extra charge.

I realize that some members are only interested in the great shipping benefits of Amazon Prime. However, I'm hoping you'll at least try our Prime instant video benefits. We find that customers who **use** both the shipping and the video benefits of Prime get even more value and satisfaction out of their memberships.

Sincerely,

Michael Pauli
Vice President
Amazon Prime Instant Video

P.S. People have asked us if **Prime Instant Video is like Netflix**? It's not just like Netflix. As a Prime member, you're already entitled to unlimited free streaming of more than 40,000 videos. You can easily compare those to what you get in Netflix. Plus, Prime members get the added benefit that Netflix doesn't have, like *Downton Abbey* and *Under the Dome*. But of course the biggest difference is that a Netflix subscription will cost you at least $96 per year whereas Prime Instant Video is already included with your Amazon Prime membership at no extra cost. It just makes sense to give it a try.

That old fridge or freezer may be costing you money.

ComEd will pick up your old, working fridge or freezer for FREE and recycle it in an environmentally responsible way. Visit ComEd.com/FridgeRecycling for details.

Flood Zone:	A	Map Panel Number:	250145-0015-A
Effective Date	05/10/2013	Insurance Term	12 Months
Coverage Amount:	$250,000.00		

NOTICE OF FLOOD INSURANCE REQUIREMENT

Dear Customer:

We previously notified you that we did not have evidence of a flood insurance policy for the above referenced property. As of this date, we still have not received evidence of flood insurance. If we do not receive a copy of a valid flood insurance policy within 15 days of the date of this letter, lender-placed flood insurance coverage will be placed on your property for an additional one year term.

When you were originally notified of the need for this coverage, it was explained that federal law and the terms of your Mortgage or Deed of Trust require flood insurance be purchased and maintained for the life of the loan, on mortgage loans for buildings located in a Special Flood Hazard Area (SFHA) as shown on a map designated by the Federal Emergency Management Agency (FEMA).

As we reminded you in previous notices, the cost of the insurance currently in force, and due to expire, may be substantially higher than insurance you can obtain by contacting an insurance agent. Your agent can help you obtain a policy through the National Flood Insurance Program (NFIP) or authorized Write Your Own (WYO) insurance company.

The Coverage Amount we purchase on your behalf may not protect your equity in the property in the event of a loss. The coverage amount placed on your property would be based on the replacement value which we believe is coverage. All the last homeowners policy you purchased. If we do not have this information, the coverage amount will be based on the unpaid principal balance of all mortgage liens against the property that are serviced by us. Lender placed insurance does not provide guaranteed replacement cost or coverage for your contents. If a flood occurs, you will not be compensated for loss or damage to personal belongings, furniture or equipment. This coverage is designed to protect our interest in the property. We recommend you contact your agent immediately to obtain coverage and limits adequate to replace the building and your contents.

Condominium Owners

The replacement value of your unit is based on replacement cost/coverage information obtained from your fire and/or flood association policies divided by the number of units covered. If we do not have this information, the coverage amount will be based on the unpaid principal balance of all mortgage liens against the property that are serviced by us.

A PLEDGE TO AMERICA

America is more than a country

America is an idea – an idea that free people can govern themselves, that government's powers are derived from the consent of the governed, that each of us is endowed by their Creator with the unalienable rights to life, liberty, and the pursuit of happiness. America is the belief that any man or woman can – given economic, political, and religious liberty – advance themselves, their families, and the common good.

America is an inspiration to those who yearn to be free and have the ability and the dignity to determine their own destiny

Whenever the agenda of government becomes destructive of these ends, it is the right of the people to institute a new governing agenda and set a different course.

These first principles were proclaimed in the Declaration of Independence, enshrined in the Constitution, and have endured through hard sacrifice and commitment by generations of Americans.

In a self-governing society the only bulwark against the power of the state is the consent of the governed, and regarding the policies of the current government, the governed do not consent.

An unchecked executive a compliant legislature, and an overreaching judiciary have combined to thwart the will of the people and overturn their votes and their values, striking down long-standing laws and institutions and scorning the deepest beliefs of the American people.

An arrogant and out-of-touch government of self-appointed elites makes decisions, issues mandates, and enacts laws without accepting or requesting the input of the many

Rising joblessness, crushing debt, and a polarizing political environment are fraying the bonds among our people and blurring our sense of national purpose.

Like free peoples of the past, our citizens refuse to accommodate a government that believes it can replace the will of the people with its own. The American people are speaking out, demanding that we realign our country's compass with its founding principles and apply those principles to solve our common problems for the common good.

The need for urgent action to repair our economy and reclaim our government for the people cannot be overstated.

With this document, we pledge to dedicate ourselves to the task of reconnecting our highest aspirations to the permanent truths of our founding by keeping faith with the values our nation was founded on, the principles we stand for and the priorities of our people. This is our Pledge to America.

We pledge to honor the Constitution as constructed by its framers and honor the original intent of those precepts that have been consistently ignored – particularly the Tenth Amendment, which grants that all powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively or to the people.

We pledge to advance policies that promote greater liberty wider opportunity a robust defense, and national economic prosperity

We pledge to honor families, traditional marriage, life, and the private and faith-based organizations that form the core of our American values.

I met a man who wasn't there
He wasn't there again today
Oh how I wish he'd go away

When I came home last night at three
The man was waiting there for me
But when I looked around the hall
I couldn't see him there at all!
Go away, go away, don't you come back any more!
Go away, go away, and please don't slam the door

Work Description

CONFIRM ARRIVAL
Upon arrival at the customer's location, check in with the customer and leave a work order note to confirm your arrival onsite. This can be been remotely through OnForces IVR system. Instructions are located at top of Service Pro Instructions page of printed work order.

Use only the CSA service receipt (Call Completion Form) that is either posted to the work order or the service receipt that will be emailed to you. Do not use the service receipt that is integrated into the OnForce system. At the completion of your call please email the customer signed service receipt to hsgfilquality@mail.net

Inside the PACKING LIST ENCLOSED envelope adhered to the outside of the box that you received your parts in, is a pre-paid, pre-addressed shipping label for you to place on top of the same box to return all unused or defective parts.

Customer signed service receipts must be sent to hsgfilquality@mail.net on the same day or the day after the service call was completed. CSA will not approve work orders until the paperwork has been received and parts have been shipped back to us.

30 Day Warranty

Pro must agree to warranty work parts need until the end of business 30 days following day of service. If there is a call back Pro will go back to site making every effort to return within 24 hours. If cause is confirmed to be covered under the original scope of work, call back will not result in payment, otherwise, call back will be paid. If another Pro is required to repair a warranty related issue for any reason the cost of the call back may be deducted from the original work order value or may be charged back to the Pro if the work order is closed.

Authorization to Obtain and Disclose Information

Name of Insured/Proposed Insured (Please Print) _____ Date of birth / /

I, the Insured/Proposed Insured above or the Insured/Proposed Insured's Personal Representative acting on behalf of the Insured/Proposed Insured, hereby authorize all of the people and organizations listed below to give American General Life Insurance Company ("AGL") The United States Life Insurance Company in the City of New York ("US Life") and any affiliated company (AGL, US Life and affiliated companies collectively the "Companies") and their authorized representatives including agents and insurance support organizations, (collectively the "Recipient") the following information

- any and all information relating to my health (except psychotherapy notes) and my insurance policies and claims, including but not limited to, information relating to any medical consultations, treatments, or surgeries, hospital confinements for physical and mental conditions, use of drugs or alcohol, drug prescriptions, and communicable diseases including HIV or AIDS, and
- information about me, including my name, address, telephone number, gender and date of birth

I hereby authorize each of the following entities ("Providers") to provide the information outlined above.

- any physician, nurse or medical practitioner or practitioner group,
- any hospital, clinic, other health care facility, pharmacy or pharmacy benefit manager,
- any insurance or reinsurance company (including, but not limited to, the Recipient or any of the Companies as defined above) which may have provided me with life, accident, health and/or disability insurance coverage, or to which I may have applied for insurance coverage, but coverage was not issued,
- any consumer reporting agency or insurance support organization,
- my employer, group policy holder or benefit plan administrator, and
- the Medical Information Bureau (MIB).

I understand that the information obtained will be used by the Recipient to

- determine my eligibility for insurance,
- underwrite my application for insurance,
- determine my eligibility for benefits,
- if a policy is issued, determine my eligibility for benefits and contestability of the policy, and
- detect fraud or abuse or for compliance activities, which may include disclosure to MIB and participation in MIB's fraud prevention or fraud detection programs.

I hereby acknowledge that the Companies are subject to certain federal privacy regulations. I understand that information released to the Recipient will be used and disclosed as described in the Notice of Health Information Privacy Practices, but that upon disclosure to any person or organization that is not a health plan or health care provider, the information may no longer be protected by federal privacy regulations.

I understand that the Recipients requesting access to my (electronic or paper) medical records are acting as a patient authorized representative and will attempt to access my medical records in an efficient manner, including electronic interchange through a Health Information Exchange or directly through my Providers' electronic health record system.

I may revoke this authorization at any time, except to the extent that action has been taken in reliance on this authorization or other law allows the Recipient to contest a claim under the policy or to contest the policy itself, by sending a written request to: American General Life Companies Service Center, P.O. Box 9000, Amarillo, TX 79105-9000. I understand that my revocation of this authorization will not affect uses and disclosures of my health information by the Recipient for purposes of underwriting, claims administration and other matters associated with my application for insurance coverage and the administration of any policy issued as a result of that application.

I understand that the signing of this authorization is voluntary, however, if I do not sign the authorization, the Companies may not be able to obtain the information necessary to complete my application.

This authorization will be valid for 24 months. A copy of this authorization will be as valid as the original. I understand that I am entitled to receive a copy of this authorization.

To #PS_Hilliard-Staff <PSD-ARDLIBRARY@columbuslibrary.org>

Staff,
Our fax machine is only able to send local (614 area code) faxes at this point. We are no longer able to send long distance or 1-800 number faxes. See below for the help desk ticket.

We can check whether the problem in on our end by sending a fax to 1 614-479-3959 which goes to our IT department (you can call x1225 to confirm receipt) or for long distance faxes 1 213 294 2943 and then going to the website https://www.faxtoy.net/ to see if the fax went through. This is what I did today to confirm that long distance faxes were not going through. Just call me Mr. Tech.

Results should be correlated and interpreted in conjunction with all other pertinent clinicopathological findings. Cancer investigators believe that presence of circulating tumor cells (CTCs) is linked as an indicator of metastasis. Metastasis is a complex multistep process that includes epithelial-mesenchymal transition (EMT), in which tumor cells are characterized by loss of cell adhesion, repression of E-cadherin, acquisition of mesenchymal markers, increased cell motility, and invasiveness (1) HER2 is recognized as an important predictive and prognostic tumor in breast cancer (2) HER2 status is predictive of a potential response to HER2 targeted agents such as lytoxib and trastuzumab (3)

*CTC is defined as CD45- DAPI+ CK+ or CK- cell

TEST

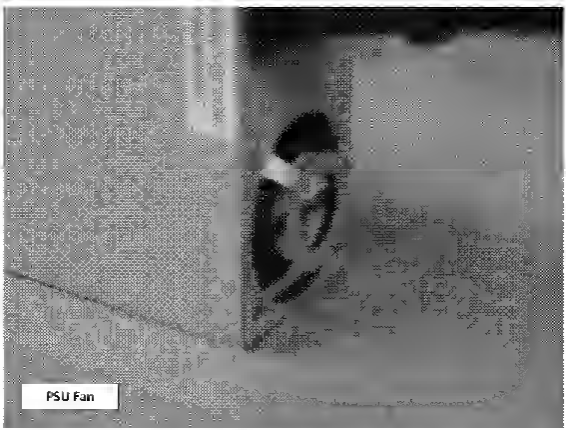
If the PSU does not have a switch, then as soon as you connect the power cord, power should flow through the PSU and you can then observe the fan on that power supply to see if it turns as shown in the image that follows:



If the fans turns, then this means that the PSU is, at least, delivering some voltages out and overheating might not be occurring. If, on the other hand, the fan does not turn, then overheating is, most, likely occurring and the PSU will eventually fail and may damage some other components, in the process. This test works ninety nine percent of the time. There is however, that one percent. If you want to be sure of the power supply's functionality I would suggest that you purchase a power supply tester. This will give you, more, accurate results then the PSU Paper Clip test.

BWCA Lessons learned

Don t ever park! Hauling a too heavy packcan put damper on the trip. spend the money for a decent pack. you can get them for $50 and gander mountain and treat yourself to that pack.

Don t bring collapseable fishing poles. They break easy

Bring leaches Or bring minnows.

Do your homework on f shing. bring a local with you or maybe even hire a guide. You are not guaruntned to catch fish.

Bring a fish net. Maybe collapseable if it is durable.

Don t plan too many meals that require cooking over a camp fire. It takes a long time to find wood build the fire. boil water. cook, clean up. etc. etc. If you must do this. do it for lunch

Bring prepackaged energy food for breakfast. granola bars. pop tarts. gorp. jerky

Coordinate quantities with the others to avoid bringing too much.

Daily plan should be something like this:

- Get up early and fish.
- If you have success come back and eat them for lunch
- Relax in the afternoon. Go back out and fish in the evening.

Don t change your clothes until they get wet

Chairs are a luxury that may be worth it

Use the campstove more. it may be heavy but it will save a ton of time in the campsite. bring extra stoves of you have a big group

Find your campsite before noon. Pick a site that has good access to daytrip canoe routes. don t move every day. Also. be sure there is enough a rflow to allow a place to be with fewer bugs

Prepackage your meals in a zploc. and write the amount of water needed on the bag.

Bring a bottle for water that holds exactly a cup of water

Bring a ceramic water filter. You can clean it in the field.

Bring people who can pull their weight. and don t complain. Don t bring young or needy children unless you want to spend your time taking care of them. If you do bring children, bring lots of snacks and junk food. or kids get hungry often and you don t want to have to cook all the time.

Prepare for rain! Storms can come up quickly. bring your rain gear whenever you go out

Program a GPS with key locations and alternate locations. Mark these on your map. It can save you time looking for portages.
Bring a weather radio. so you can plan your day trips and cut your trup short if the weather

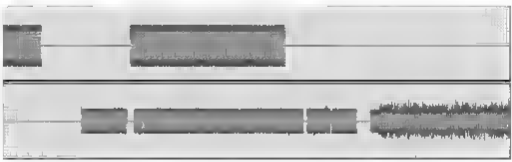
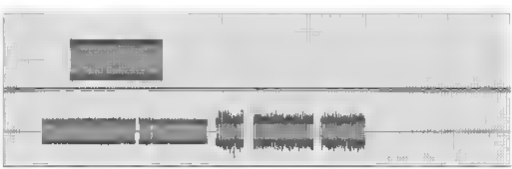
connection is at least 2 megabits per second That's enough to hold 30 simultaneous 64 kilobit channels Chances are good too that your broadband connection is much bigger than that Your internet provider will be happy to take your money for more bandwidth But know that it is quite likely that more bandwidth will not resolve your VoIP quality problems Usually fax problems on VoIP channels occur due to what is known as "jitter", and usually an increase in available bandwidth does not necessarily reduce jitter

Here are three visual examples of jitter found in VoIP sent faxes Each example was sent through a different VoIP provider Pay close attention as to how they differ from the example above



Notice that the message signal is interrupted with small gaps of near silence Realize that the largest gap in that signal is only five one hundredths of one second (5/100 sec) The human ear would not likely detect it Notice however that the receiving fax machine did notice it and justly assumed that the transition to silence indicated that it was time for it to respond Consequently both the sender and receiver start signaling at the same time and thus become dis synchronous



Here is another example of nearly the same thing, except that this time both the message signal and the image data signal are broken Depending on how the receiving device is programmed a single instance of either of these problems may not necessarily doom a fax session However once the two fax endpoints lose synchronization the risk of failure is significantly increased because one or both of the endpoints cannot immediately hear correct signaling from the other Unfortunately even if they do resynchronize more jitter is likely to disrupt the communication again in the same call

Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document.

To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other. For example, you can add a matching cover page, header, and sidebar. Click Insert and then choose the elements you want from the different galleries.

Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply styles, your headings change to match the new theme.

Save time in Word with new buttons that show up where you need them. To change the way a picture fits in your document, click it and a button for layout options appears next to it. When you work on a table, click where you want to add a row or a column, and then click the plus sign.

Reading is easier, too, in the new Reading view. You can collapse parts of the document and focus on the text you want. If you need to stop reading before you reach the end, Word remembers where you left off - even on another device.

Thanks you for co[illegible] [illegible] [illegible] landscaping in your new divisional headquarters We are pleased to submit our proposal herewith for the concept phase as agreed earlier

Since your available area is somewhat limited we suggest a modular layout This concept emphasizes space conservation and yet still provides for a modern, pleasing atmosphere.

Enclosed are two floor plans The first one will allow you to keep your present furniture The second was designed with the intention that our new space-saving modules be used Notice that the latter will provide for more spacious accommodations and/or room for additional personnel Also included are the specification sheets on these products

After you have had a chance to study our ideas I would like to set up a meeting during October to discuss any further refinements I will have my secretary make the arrangements Please call me in the interim if you have any questions

Market Timing – It's Everything in Trading and Investing

Like 2k Rise. Sign Up to see what your friends like.

By Ben Logan, Online Trading Academy Vice President of Education and Product Development

I was asked the other day about "volatility" by a popular media outlet. The question was: "What should traders/investors do in a volatile market?" I didn't have to think about the answer; I had it before they were halfway done with the question. Simple: if you don't know how to time the market's turning points in advance, don't have money at risk in the market. If you do know how to time the market's turning points, you love market volatility. Recently, the markets have experienced a period of extreme market volatility. During these periods, those who know market timing typically see above average profits and those who don't experience above average losses. No matter what type of trading or investing you are doing, you can't get around market timing. Furthermore, turning to the world of conventional technical and fundamental analysis for market timing is NOT the answer because these two lagging schools of thought are high risk and low reward. If you don't believe me, go ahead and try it, but remember I warned you.

Let's take a look (below) at a recent and very important Extended Learning Track (XLT, graduate online live trading and one on one) session from July 20th, five days before the major market collapse. We started by analyzing the weekly chart of the S&P Futures. We have been going over this chart for weeks because price reached our pre-determined supply level of 1349. The lower yellow shaded area on the left. This is supply level because it meets our definition of a price level where supply greatly exceeds demand which is very different than the conventional definition of "resistance" that you read about in the trading books.

Sunday School Take Home Page

To parents

This page lets you know what your child learned in Sunday school today. In addition, you will find this week's memory verse, a suggested activity, and a short prayer to reinforce the lesson. Being involved and interacting with your child can be very rewarding for both of you.

What we learned.

Today, your child learned that Jesus is calling him or her to follow Him. They also discovered what it means to give up everything to follow Jesus, like the apostles. Our hearts can hold onto bad attitudes like selfishness, greed, and pride. We are to leave these things behind, and instead fill our hearts with the love of Jesus and follow Him.
(Scripture used: Matthew 4:18-22, Mark 2:13-17, John 1:43-49)

Memory Verse:

"These are the names of the twelve apostles: first, Simon (who is called Peter) and his brother Andrew, James son of Zebedee, and his brother John," (Matthew 10:2 NIV)

During the next few weeks, your child will memorize the names of the twelve apostles. Today, they concentrated on the first four names found in Matthew 10: 2-4. Practice saying these names several times with your child during the week. This will not only help him or her to remember the names...but also it will help to reinforce what he or she has learned during class.

Suggested Parent/Child Activity:

During class, the children wrote a letter describing several ways they can follow Jesus throughout the week. The children were instructed to take the envelope home and give it to their parents.

Give your child back the envelope Monday morning before going to school, so your child can open it and be reminded how they can follow Jesus at school. Then, give it to them again when they get home to be reminded how to follow Jesus at home. Then a third time next Sunday before going to church to be a reminder how to follow Jesus at church.

If your child did not bring home an envelope, you can simply discuss with them how they can follow Jesus during these times.

Daily Prayer:

Dear Lord, I am ready to follow You. Help me remove anything in my heart that could hinder me from doing this. Give me a pure heart, one that is not selfish or envious, one that is not boastful or proud. Give me the courage to follow You everywhere I go. Amen.

That was the document I read and now I have placed it in the tin box beside the bas-relief and the papers of Professor Angell. With it shall go this record of mine -- this test of my own sanity, wherein is pieced together that which I hope may never be pieced together again. I have looked upon all that the universe has to hold of horror, and even the skies of spring and the flowers of summer must ever afterward be poison to me. But I do not think my life will be long. As my uncle went, as poor Johansen went, so I shall go. I know too much, and the cult still lives.

Cthulhu still lives, too, I suppose, again in that chasm of stone which has shielded him since the sun was young. His accursed city is sunken once more, for the Vigilant sailed over the spot after the April storm, but his minions on earth still hallow and glance and slay around idol-capped monoliths in lonely places. He must have been trapped by the sinking, whilst within his black abyss, or else the world would by now be screaming with fright and frenzy. Who knows the end? What has risen may sink, and what has sunk may rise. Loathsomeness waits and dreams in the deep, and decay spreads over the tottering cities of men. A time will come -- but I must not and cannot think! Let me pray that if I die not survive this manuscript, my executors may put caution before audacity and see that it meets no other eye.

The Lovecraft Library wishes to extend its gratitude to Eulogio Garcia Recalde for transcribing this text. 2 #TEXT????

Fit Line and Fit Polynomial

Using the **Fit Line** command, you can add straight line fits to your scatterplot using least squares regression. Using the **Fit Polynomial** command, you can fit polynomial curves of a certain degree using least squares regression.

Figure 4.8 Example of Fit Line and Fit Polynomial

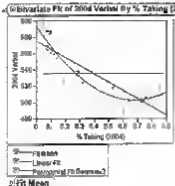

Figure 4.8 shows an example that compares a linear fit to the mean line and to a degree 2 polynomial fit.

Note the following information.

- The **Fit Line** output is equivalent to a polynomial fit of degree 1.
- The **Fit Mean** output is equivalent to a polynomial fit of degree 0.

Linear Fit and Polynomial Fit Reports

The Linear Fit and Polynomial Fit reports begin with the equation of fit.

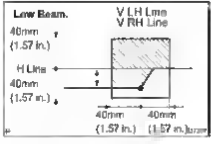
(c) Check headlamp aim

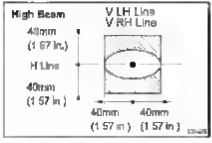
(1) Align the paper and vehicle

- Make a distance of 3 m (9.84 ft) between the headlamps and the paper. Place the paper against a wall with the H line at the same height as the center mark.
- Align the center of the vehicle with the V line on the paper. Ensure that the paper forms a 90° angle to the V line.

(2) Start the engine.

(3) Turn on the headlamps and check that the aim is within the specified range shown in the illustration.





(d) Adjust the aim in the vertical direction

Using a screwdriver, adjust the headlamp aim into the specified range by turning aiming screw A.

NOTICE

- **Adjust the headlamp aim by turning the screw in the tightening direction.**
- **When the screw is tightened excessively, loosen it once and retighten it to adjust the headlamp aim.**

HINT:

The headlamp aim moves down when turning the screw clock-

Blue Hill Memorial Hospital s proud to support the local and regional economy wherever possible and we encourage our patients and their loved ones to do the same. We do not endorse any one business over another the following list of accommodations, restaurants, and other retail establishments is simply provided as a service to our patients. Our economy is large y seasonal. The hours, dates of operation, and services provided by local businesses can change suddenly and without notice. We strongly recommend calling ahead to ensure that business(es) of your choice will meet your needs.

DISPOSITIF ANTI-BASCULEMENT

AVERTISSEMENT : Ce produit n'est qu'une protection. Il ne remplace pas la surveillance adéquate d'un adulte. Le fabricant n'assume aucune responsabilité pour l'installation incorrecte ou des contraintes excessives sur les vis, supports ou sangles.

De jeunes enfants peuvent être blessés par des meubles qui basculent. Il est donc fortement recommandé d'employer le dispositif anti-basculement.

S'il est adéquatement installé, ce dispositif aidera à une protection contre le basculement des meubles. Ce dispositif anti-basculement DOIT être fixé à un montant ou à une structure murale de même résistance.

Matériel compris	(2) Supports	(1) Sangle en nylon
	(2) Vis de montage pour montants longues	(2) Vis de montage latéral pour meubles courtes

Remarque : Pour un montage sécuritaire, il est indispensable d'utiliser le matériel convenant au type de mur où l'article vous souhaitez installer ce produit. Le matériel compris n'est conçu que pour un montage sur cloison sèche ou sur montant. Pour les autres types de murs (par exemple en plâtre, en béton ou en brique), veuillez consulter votre quincaillier pour obtenir des conseils sur la fixation.

Installation

1) EMPLACEMENT DES MONTANTS : Utilisez un détecteur de montant pour trouver l'emplacement des montants en bois du mur situés à l'arrière de l'emplacement final de l'article. Faites une marque à l'emplacement des montants à l'aide d'un crayon.

2) INSTALLATION DU SUPPORT LATÉRAL DU MEUBLE : Déplacez le meuble à proximité du mur à son emplacement final. Utilisez des morceaux de ruban adhésif ou un crayon afin de marquer l'emplacement des montants sur le meuble. Déplacez de nouveau le meuble de manière à avoir accès à l'arrière de celui-ci, puis servez-vous des marques afin de trouver un point de montage pour le support latéral du meuble. Assurez-vous que le support est fermement fixé au cadre du meuble et aussi haut que possible. Rappel : Le support latéral du meuble doit être installé à proximité d'un montant. À l'aide d'un crayon et du support comme guide, faites une marque aux « emplacements des vis » sur le meuble par les trous du support.

Utilisez un foret de 3/32 po pour percer des avant-trous dans le meuble aux « emplacements des vis ». Utilisez les DEUX (2) vis courtes pour fixer le support latéral du meuble. Ce support peut être installé à la verticale ou à l'horizontale ou basse (voir la Figure 1).

3) INSTALLATION DU SUPPORT LATÉRAL MURAL : Placez le support latéral mural le long des marques du montant choisi de manière à ce qu'il soit vis-à-vis au support latéral du meuble lorsque le meuble sera placé à son emplacement final. Le support latéral mural devrait être situé 2,54 CM (1 POUCE) plus bas que le support latéral du meuble (voir la Figure 3). Utilisez les DEUX (2) vis longues pour fixer le support latéral mural au mur. Rappelez-vous de placer le support latéral mural à la verticale de manière à ce que les deux vis s'enfoncent dans les montants choisis (voir la Figure 2).

4) FIXATION DE LA SANGLE : Lorsque les deux supports sont bien fixés, déplacez le meuble à l'endroit voulu, puis passez la sangle par les ouvertures de chacun des supports et dans « la boucle ». Serrez la sangle jusqu'à ce que vous entendiez plusieurs « clics ». Le meuble est maintenant fixé de façon sécuritaire au mur.

Remarque : Si vous devez déplacer le meuble, il est facile de relâcher la sangle en appuyant sur le levier ou bouton situé sur la boucle tout en tirant la sangle de la boucle. Assurez-vous de fixer de nouveau la sangle une fois que vous replacez le meuble à l'endroit voulu.

Po-Joke #24

A nurse is giving a young medical intern a tour of the hospital.
The intern approaches one bedridden patient and asks, "Why are you here?" The patient replies, "Wee sleekit cowerin' timorous beastie/O what a panic is in thy breastie."
The intern moves on to the next bed and asks the same question. "Why are you here?" The patient answers, "O my luv is like a red, red, rose that's newly sprung in June."
The intern moves on to a third bed and asks again. "Why are you here" to which the third patient replies, "The best laid plans of mice and men may often gang awry."
At this the intern turns to the nurse and asks "What ward is this anyway?" And the nurse answers "It's the Burns Unit."

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-855 330 1236 (a toll-free number in the United States). When it's finished transmitting, point your web browser to Fax.To. — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to JaxZam, also now lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

HELLO

Scare At Seattle Seahawks Stadium

Training at the NFL's Seattle Seahawks stadium was delayed nearly two hours this morning, after a player reported finding an unknown white powdery substance on the ground.

Initially the NFL team thought it was a prank!

Training was immediately suspended, while police and Homeland Security officials were called to investigate.

After a complete analysis, Seattle Police forensic experts determined that the white substance, unfamiliar to most of the players, was in fact, the goal line.

Practice will resume this afternoon after Police and Homeland Security decided the team was unlikely to encounter the substance again.

Feel free to substitute to the team of your choice -- England's World Cup team, for example -- when sending this joke to your friends.

IF I WOULD RETURN IN BOOK OR CARD FORMAT ARE ISSUED ONLY TO U.S. CITIZENS OR NON-U.S. CITIZEN NATIONALS. EACH PERSON MUST GET OR HIS OR HER OWN PASSPORT BOOK OR PASSPORT CARD. THE PASSPORT CARD IS A U.S. PASSPORT, BUT IS SMALLER THAN A BOOK AND NOT TRADITIONAL PASSPORT LOOK. IT MAY BE USED FOR IDENTITY AND NATIONALITY AND IS SUBJECT TO CERTAIN PASSPORT LAWS AND REGULATIONS. UNLIKE THE PASSPORT BOOK, THE PASSPORT CARD IS VALID ONLY FOR ENTRY TO THE U.S. CITIZENS AT LAND BORDER CROSSINGS AND SEA PORTS OF ENTRY WHEN TRAVELING FROM CANADA, MEXICO, THE CARIBBEAN AND BERMUDA. THE U.S. PASSPORT CARD IS NOT VALID FOR INTERNATIONAL AIR TRAVEL.

APPLICANTS WHO HAVE HAD A PREVIOUS U.S. PASSPORT BOOK AND/OR U.S. PASSPORT CARD

Your most recent passport book and/or passport card was issued when you were under 16 years old or the date of issue for your most recent passport book and/or passport card was more than 15 years ago and you are now 16 years old or older, you must apply in person and submit the following:

- Your most recent passport book and/or passport card, which will be cut to deface it and returned to you.
- Your parent(s) or legal guardian(s) must appear in person with you and sign your application.
- Proof of your parent(s) or legal guardian(s) relationship to you (examples: your birth certificate listing your parent(s), your adoption decree, your court-ordered guardianship papers).
- Your parent(s) or legal guardian(s) identification.

SPECIAL REQUIREMENTS FOR CHILDREN

A U.S. PASSPORT ISSUED BY PUBLIC LAW 106-113 AND 22 CFR 51.28:

- Is valid for the period of time listed (under age 16 both parents or the child's legal guardian(s) must consent and present ID for the issuance).
- Is limited to 5 years for adults.
- Is limited to the relationship to the child listed on the application (e.g., AUNT).
- Requires parental identification.

IF ONLY ONE PARENT APPEARS, YOU MUST ALSO PRESENT ONE OF THE FOLLOWING:

- Proof of sole custody of the child (court order or DS-3053 indicating the sole parent has full parental custody of the child).
- Proof of the other parent's death (death certificate).
- Proof that the child was born to only one parent (child's birth certificate).
- Written consent from the other parent under penalty of perjury (explaining in detail the reason parent is unavailable).

A U.S. PASSPORT ISSUED BY REGULATION 22 CFR 51.21 AND 51.28:

- Is valid for 5 years for a passport book and/or passport card issued to a minor.

FAILURE TO PROVIDE INFORMATION REQUESTED ON THIS FORM, INCLUDING YOUR SOCIAL SECURITY NUMBER, MAY RESULT IN SIGNIFICANT PROCESSING DELAYS AND/OR THE DENIAL OF YOUR APPLICATION.

WHAT TO SUBMIT WITH THIS FORM:

1. PROOF OF U.S. CITIZENSHIP (Examples of U.S. citizenship are a previous passport issued to you, your birth certificate, etc.)
2. PROOF OF IDENTITY (Your most recent passport issued to you, your driver's license, etc.)
3. PHOTOGRAPH (Two identical photographs of you)
4. FEES (Please visit our website at travel.state.gov for current fees)

See page 2 of this instructions for detailed information on the completion and submission of this form.

WHERE TO SUBMIT THIS FORM:

- Appear in person and submit the application in person to one of the following acceptance agents: a clerk of a federal or state court or probate court; a designated employee at a passport agency (by appointment only); or a U.S. postmaster or designated clerk at a U.S. post office or certain libraries. To find your nearest acceptance facility, visit our website at travel.state.gov or contact the National Passport Information Center.

HP Fax Products - Testing Your HP Fax Machine with the HP Fax Test Service

Introduction

This document will assist you in testing your HP fax machine using the HP Fax Test Service.

Print this document for easy reference by clicking the **Printable Version** link in the upper right corner of this page.

Test your fax machine

To test the reliability of your fax machine, follow the direct mail below.

Before You Begin

Be sure that your phone number is not Caller ID blocked by your caller, voice computer caller feature(s) or any international, wireless, or VoIP (voice over Internet protocol) service provider. Caller ID blocking features prevent correct fax operation. Other phone company services, such as Call Waiting, can also prevent your fax machine from receiving a fax, including voice mail, call blocking, or call privacy features.

Troubleshooting

Whenever troubleshooting a fax issue, it is good practice to first run **Automatic Reports** or **Run All** for **Every Error** before attempting a fax test. This may even solve the problem before a call would be generated. Review Guide you in future troubleshooting. This option is available on most HP LaserJet or Officejet products. Consult the product User's Guide for specific steps.

1. Send a one-page black and white test fax to **1-888-hpfaxtest** (1-888-473-2938).
2. When your fax is received by the HP Fax Test Fax Service, we'll send an automated electronic reply to you confirming that we successfully received your fax. This verifies that you can both send and receive faxes with your fax machine.

If you do not receive an HP fax within 5 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for fax machine setup and configuration.

Troubleshooting

The most common cause of failure is that the fax number set in the Fax Header on the machine does not match the number of the phone line connected to the fax. Also, ensure that the fax header contains the full 10 digit telephone number of the fax machine and not simply the area code.

For more information or assistance, click **Contact HP** at the top of this page.

Sentence Skills

In an ACCUPLACER® placement test, there are 20 Sentence Skills questions of two types:

- The first type is *sentence correction* questions that require an understanding of sentence structure. These questions ask you to choose the *most appropriate* word or phrase for the underlined portion of the sentence.
- The second type is *construction shift* questions. These questions ask that a sentence be rewritten according to the criteria shown while maintaining essentially the same meaning as the original sentence.

Within these two primary categories, the questions are also classified according to the skills being tested. Some questions deal with the logic of the sentence, others with whether or not the answer is a complete sentence, and still others with the relationship between coordination and subordination.

Sentence Skills Sample Questions

Directions for questions 1–5

Select the best version of the underlined part of the sentence. The first choice is the same as the original sentence. If you think the original sentence is best, choose the first answer.

Resolution

Occasionally, Windows might not read your user profile correctly such as if your anti-virus software is scanning your computer while you try to log on. Before you follow the methods here, try restarting your computer and logging on with your user account again to resolve the issue. If you restart your computer and it does not resolve this issue, use the following methods to resolve this issue.

Note You must be able to log on to an administrator account to fix your user profile or copy your data to a new account. Before you resolve the issue, log on to Windows by using another account that has administrative permissions, or restart in safe mode to log on with the built-in administrator account. For more information about how to start in safe mode, visit the following Microsoft Web site:

Start your computer in safe mode
(http://windows.microsoft.com/en-US/windows7/Start your computer in safe mode)

Method 1: Fix the user account profile

To fix the user account profile, follow these steps:

Important This section, method, or task contains steps that tell you how to modify the registry. However, serious problems might occur if you modify the registry incorrectly. Therefore, make sure that you follow these steps carefully. For added protection, back up the registry before you modify it. Then, you can restore the registry if a problem occurs. For more information about how to back up and restore the registry, click the following article number to view the article in the Microsoft Knowledge Base.

OFFICE OF THE DIRECTOR

Un mensaje del director de la Oficina del Censo de los Estados Unidos

La Oficina del Censo de los Estados Unidos está realizando la Encuesta sobre la Comunidad Estadounidense. Un representante de la Oficina del Censo se comunicará con usted para ayudarle a completar la encuesta. La encuesta le formulará preguntas sobre características de su hogar, incluyendo temas tales como la educación, el empleo y la vivienda. Le agradecería su ayuda, ya que el éxito de esta encuesta depende de usted.

La Encuesta sobre la Comunidad Estadounidense obtiene información actual y crítica que se utiliza para satisfacer las necesidades de comunidades en todo Estados Unidos. Por ejemplo puede que los resultados de esta encuesta se usen para decidir dónde se necesitan nuevas escuelas, hospitales y estaciones de bomberos. El gobierno federal y los gobiernos estatales y locales usan los datos de la encuesta para tomar decisiones y elaborar programas que brinden atención médica, educación y servicios de transporte que los ciudadanos a usted y a su comunidad. La información de esta encuesta también ayuda a dichas comunidades a formular planes de respuesta en situaciones de emergencia que pudieran afectarle a usted y a sus vecinos.

La Oficina del Censo no le escogió a usted personalmente, sino su dirección particular como parte de una muestra al azar. Todas las personas cuyos domicilios resultan seleccionados serán obligadas por ley a responder a esta encuesta (Título 13, Código de los Estados Unidos, Secciones 141, 193 y 221). Calculamos que esta encuesta tomará aproximadamente 40 minutos de su tiempo.

Desee recalcar que toda información que le proporcione a nuestro representante se mantendrá confidencial. La ley estipula que la Oficina del Censo no puede publicar ni divulgarle a nadie ninguna información que lo identifique personalmente a usted o a su hogar (Título 13, Sección 9). La información que proporcione podrá utilizarse únicamente para propósitos estadísticos.

Si tiene acceso a Internet y desea obtener más información acerca de la Encuesta sobre la Comunidad Estadounidense, visite nuestro sitio de Internet en census.gov/acs.

Gracias por su ayuda.

Q: Why are hawks such great football fans?
A: They're always watching the game on the field.

Q: What has many eyes but cannot see?
A: A potato.

Q: Why are basketball players such sloppy eaters?
A: Because they always dribble.

Q: How do you know when you've built your own?
A: When your feet smell and your nose runs!

Q: Why does Santa have so many reindeer?
A: So he can have venison!

Q: Why did the mouse dance on the peanut butter jar?
A: Because it was trying to open.

Q: What did the metal say to the refrigerator?
A: Close the door, I'm freezing!

Q: What did one eye say to the other?
A: There is something between us that smells!

Q: What did the tomato eat for breakfast?
A: Oatmeal!

Q: What do you get when you cross a bell and a skunk?
A: An alarm clock.

Q: What do you get when you cross cassava and a rose?
A: A cassa-flower.

Q: When part of a hen has the most feathers?
A: The tail!

Q: Why weren't apples afraid on Noah's ark?
A: Only pears were aboard!

Q: Why did the little skunk listen to the big skunk?
A: Because it was older and wiser.

Q: What kind of bird can lift heavy things?
A: A crane!

Q: What does a 2,000-pound mouse say?
A: Here, kitty kitty!

Board (Regional) News

1/8/10 MLXCHANGE UPDATE
Tempo will go into **Search Only** mode at 5pm on Monday, which means no more adding or editing listings over there. Beginning 8am on Tuesday, 1/12, you may begin to add and edit in MLXchange. Tempo will remain available in Search only mode until Friday, January 29 but will not be updated with new listings.

Note: The most current version of our new profile sheets are dated 12/28/09. Visit **www.grar.org** and click on **Publications or Forms** for the latest version (slight changes to previous versions are mostly with regard to which fields are required or not)

1/8/10 MLXCHANGE UPDATE - CONTACTS/AGENT PHOTOS/BROKER LOGOS
All contacts/prospects, agent photos and broker logos are now loaded in MLXchange from Tempo. This means that any prospects you load to Tempo from now on will need to also be entered to MLXchange by the user. You will need to manually enter new searches for your prospects as well as new CMAs.

WHAT TO DO NOW
Tick-tock...you are running out of time if you have not yet started to build your searches for your clients in MLX. At the very least, agents need to re into Tempo (while they still can) and print the criteria for their Client Gateway searches and get them re-entered into MLX, if they have not done so already.

You should also be gathering info for your existing listings that will be required in MLX when you try to change status or price on a listing. Those changes should be entered into MLXchange ASAP on the 12th or by January 30 at the latest. If you attempt a price or status change beginning next Tuesday, the system will require you to fill in all 16 or so newly required fields. We have put some worksheets together to help you gather required info for these listings. We've also included some non-required fields that may be of interest to the public so you may want to get that data on your listings too. We'll provide sheets for other property types soon as we can. Go to Grar.org and click on **Publications** to get to be of this info.

Print out all of your listings in MLXchange and then print from Tempo (before January 12 or it will be too late) and compare. If anything looks questionable on your listings, please contact GRAR Member Services to report it at **GRARHelpDesk@grar.net, 585-292-5000 or 800-282 7101**

Click on **Association Resources** (right of screen) in MLXchange for a printable Rochester Neighborhood Map (all listings in the City of Rochester will require a Neighborhood be selected in MLXchange)

General **'How to' Questions** about MLXchange may be directed to **AnswerLink at 888-825-5472**. Support staff is generally available M-F from 8 30am-8 30pm and Sat/Sun from 8 30am-3 30pm.

Date Received	4/6/2018

ADDITIONAL RESULTS APPLICABLE IF BCI ORDERED AT TIME OF DIAGNOSIS

BCI Prognostic - Node Positive (1-3)

9.2% Risk of Overall Recurrence (years 0-10)

HIGH RISK CATEGORY

9.2% RISK[1] (95% CI: 5.7% - 12.6%)
OF DISTANT RECURRENCE FOR ER+ LYMPH NODE POSITIVE PATIENTS FROM YEARS 0-10[1]

1 Risk of Recurrence (ROR) is based on 5 years of BCI Prognostic or molecular variable combination of patients with positive node and ER+ breast cancer who have been treated with adjuvant endocrine therapy and no adjuvant chemotherapy per 4 years of adjuvant endocrine therapy. See below for additional details.

BCI Predictive

LOW Likelihood of Benefit

LOW LIKELIHOOD OF BENEFIT
FROM EXTENDED ENDOCRINE THERAPY[2]

BCI Predictive was developed and/or the included both ER and PR+ breast cancers. However, the study was not statistically powered to assess LN and ER/PR groups separately.

Test Description and Clinical Evidence
BCI provides two outputs based on a 23 gene expression quantitative RT-PCR signature: BCI Prognostic, and BCI Predictive.

BCI Predictive provides a prediction of likelihood of benefit from extended (>5 years) endocrine therapy (EET).[2] Patient results for this test are reported as either High Likelihood or Low Likelihood of Benefit. BCI Predictive is based on the HOXB13/IL17BR ratio as validated in the NCIC CTG MA.17 trial.[2,3]

BCI Prognostic for LN+ (1-3 positive nodes) provides an individualized estimate for a patient's risk for distant recurrence in the late (5-10 years) vs. early (0-5 years) period. Prognostic for LN+ patients (1-3 positive nodes) is based on the signature combination of the BCI gene signature as well as other standard prognostic factors. BCI prognostic for LN+ patients was validated in a blinded study of patients with 1-3 positive nodes who were treated with adjuvant endocrine and chemotherapy.[1]

Intended Use & Limitations
The Breast Cancer Index (BCI) Risk of Recurrence & Extended Endocrine Benefit Test is intended for use in patients diagnosed with estrogen receptor-positive (ER+), lymph node-negative (LN-) or lymph node positive (LN+, with 1-3 positive nodes) early-stage, invasive breast cancer, who are at distant recurrence. The BCI provides: 1) a quantitative assessment of the likelihood of late (post-5 years) and overall (0-10 years) distant recurrence following an initial 5 years of endocrine therapy (LN- patients) or 0-5 years of endocrine therapy plus adjuvant chemotherapy (LN+ patients), and 2) predictions of likelihood of benefit from extension (5+ years) of endocrine therapy. BCI results are adjunctive to the treating physician's workup. Treatment decisions made in consultation with all other clinical findings. This test was developed and its performance characteristics determined by BioTheranostics, Inc. It has not been cleared or approved by the U.S. Food and Drug Administration. The test is used for clinical purposes. It should not be regarded as investigational or for research. How this information is used to guide patient care is the responsibility of the physician. BioTheranostics is a certified under the Clinical Laboratory Improvement Amendments of 1988 to perform high complexity clinical laboratory testing.

BCR/ABL1 Analysis by PCR Quantitative RT-PCR Assay

[illegible] by the international standard for determination of minimal residual disease (MRD) in CML transcripts.

Intended Use: The detection of BCR/ABL1 fusion transcripts is utilized in the diagnosis of CML and ALL. The clinical significance of low level quantity of BCR-ABL1 is not clear. However, in the case of leukemia, may be useful in treatment management. 1.2. Frugal install

Frugal is the typical installation method for Tiny Core. That is, it is not a traditional hard drive installation, which we call "scatter mode", because all the files of the system are scattered all about the disk. With frugal, you basically have the system in two files, **vmlinuz** and **core.gz**, whose location is specified by the boot loader.

Any user files and extensions are stored outside the base OS.

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it, just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero, the site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

"Adobe issued an advisory today on a zero-day vulnerability (CVE-2011-2462) that has come under attack in the wild. According to Adobe, the issue is a UXSS memory corruption vulnerability that can be exploited to cause a crash and permit an attacker to hijack a system. So far, there are reports the vulnerability is being exploited in limited, targeted attacks against Adobe Reader 9.x on Windows. However, the bug also affects Adobe Reader and Acrobat 9.4.6 and earlier 9.x versions for UNIX and Macintosh computers, as well as Adobe Reader X (10.1.1) and Acrobat X (10.1.1) and earlier 10.x versions on Windows and Mac. Patches for Windows and Mac users of Adobe Reader X and Acrobat X will come on the next quarterly update, scheduled for Jan. 10, 2012."

Step 1: (a) Ensure the Internet light is ON on the modem.

Connect to the internet directly off of the modem by either

1.a Wired connection to one of the four available ports on the back

1.b Wireless: Connect to the Comcast 6969 network with password on bottom of modem

Step 2: Browse to 192.168.1.1 and login into the web page displayed with the following credentials

Username: admin password: on bottom of modem

Step 3: Select Advanced Setup

Step 4: Select WAN settings along the left hand side

Step 5: For ISP protocol select Transparent Bridging

Step 6: Click OK or APPLY

Step 7: From another computer (not the one connected in step 1) browse to https://192.168.2.1:4443 and if prompted proceed/continue to this site

Step 8: When the site comes up you will see near the center three options, including connect, disconnect and refresh. Click connect and if prompted for username and password provide the information. If a profile should then login to one vetted and your internet should be working again.

Windows® Fax and Scan

One place to scan and fax your documents

FAX You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax**.

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started:

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, at the bottom of the left pane, click **Scan**.

3. On the toolbar, click **New Scan**.

4. Choose the scan settings you want to use, and you're ready to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scans at any time. For more help with scanning, click the **Help** button on the toolbar.

Windows has a set of programs that it will always use by default when you're opening certain file types. Most of the time, for example, opening with the new Videos app in Windows 8. Most of the time this is fine, but you might prefer a different program to do the job, such as VLC Media Player.

To change the default program, right-click on the file you want to open and select Open with > Choose default program.

Test 2

Hello Vanessa,
This is Versel We spoke the first week of July regarding utilizing your venue space for the film I was going to be shooting scenes for along with cast meet and greet at your location

Approximately three months ago I spoke to your event director Jessica We spoke about the details utilizing your space for some specific taping on my personal movie script, "Street Walkers" Unfortunately Jessica double booked another event This resulted in the cancellation of my film and giving my company no time to find another location to re arrange our meet and greet postponing filming of brief biography visuals on each cast member and unfortunately unable to shoot certain clips for script layout towards movie including still shots

I was in contact with your event director for about a month prior reviewing available time slots

We set up a date, which was on April 25 2013 Thursday afternoon 11am 1pm On the day of my casting crew and cast producers where ready and on their way I proceeded to call Jessica that early morning to notify her we would be there at the designated time I was given to utilize your space

Due to the fact I have been a great supporter of the local Artist in the Miami scene for quite some years now who have thrown several shows on your grounds such as Miami Beat Wave Crazy Hood Productions, 93Labs, DeLa Casa Studios as well as other great Artists who have flown in from other cities and states around the world

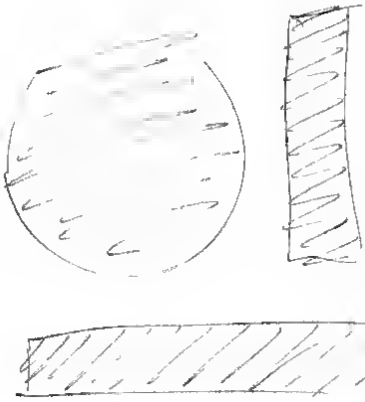
I was hopeful there would be another opportunity we could work together on the production of another event that would not only promote our mutual interest in the Art we all love but create a solid foundation for future project collaboration

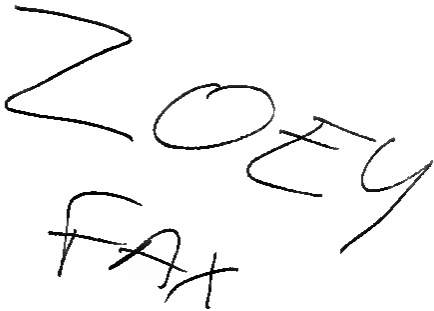
Gladly another opportunity has come up where we can once again begin to establish what I believe very strongly would be a solid, growing and prosperous business relationship.

Attached is the request written by my business partner Owner of "Reality Vision Group" with full specifications and what we have already coordinated as far as the filming aspect, crew onset, props etc

Your timely response to this email would be greatly appreciated contact me via email Versatile.Christina@gmail.com or personal cell# 305.562.8516 A.S.A.P

Thank you,





ZOEY

CAPREIT

March 30, 2015

To: All Residents
25 Bay Mills Blvd
Scarborough, Ontario

Re: Pigeons on the Property

Dear Resident(s),

We are in receipt of complaints with regards to some residents having pigeons on their balcony. To discourage these pigeons from being on the property please do not feed them. Please be advised that pigeons eat grasses, seeds, grains, berries, discarded food scraps and other items. Therefore there is no reason for you to feed them.

Please be aware that pigeons are part of the wildlife and should not be encouraged to live in residential communities. To ensure that the pigeons move from their current environment please stop feeding them. If you continue to feed them they will remain in the area to nest and continue to breed.

Therefore if you have pigeons on your balcony, please take the necessary precaution to remove them and clean your balcony on a regular basis.

If you are feeding the pigeons and you are allowing them to stay and nest on your balcony you are also responsible for cleaning up after them. Management can assist with arranging for the clean-up but you will be charged back for the cost incurred.

Your full cooperation and understanding in this matter will be greatly appreciated.

Sincerely,

CAPREIT MANAGEMENT

the legendary "Bacon Explosion" Friday night.

Bacon Explosion
Time: About 3 hours

2 pounds thick-cut sliced bacon
1 1/2 pounds Italian sausage, casings removed
3 tablespoons barbecue rub
3/4 cup barbecue sauce
12 dinner rolls

1. Using 10 slices of bacon, weave a square lattice like that on top of a pie: first, place 5 bacon slices side by side on a large sheet of aluminum foil, parallel to one another, sides touching. Place another strip of bacon on one end, perpendicular to the other strips. Fold first, third and fifth bacon strips back over this new strip, then place another strip next to it, parallel to it. Unfold first, third and fifth strips, fold back second and fourth strips. Repeat with remaining bacon until all 10 strips are tightly woven.

2. Preheat oven to 225 degrees or light a fire in an outdoor smoker. Place remaining bacon in a frying pan and cook until crisp. As it cooks, sprinkle bacon weave with 1 tablespoon barbecue rub. Evenly spread sausage on top of bacon lattice, pressing to outer edges.

3. Crumble fried bacon into bite-size pieces. Sprinkle on top of sausage. Drizzle with 1/2 cup barbecue sauce and sprinkle with another tablespoon barbecue rub.

4. Very carefully separate front edge of sausage layer from bacon weave and begin rolling sausage away from you. Bacon weave should stay where it was, flat. Press sausage roll to remove any air pockets and pinch together seams and ends.

5. Roll sausage toward you, this time with bacon weave, until it is completely wrapped. Turn it so seam faces down. Roll should be about 2 to 3 inches thick. Sprinkle with remaining barbecue rub.

6. Place roll on a baking sheet in oven or in smoker. Cook until internal temperature reaches 165 degrees on a meat thermometer, about 1 hour for each inch of thickness. When done, glaze roll with more sauce. To serve, slice into 1/4- to 1/2-inch rounds.

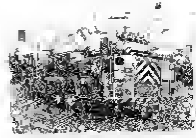
EMERGENCY VEHICLES

Because we can easily hear the sirens of an emergency vehicle before we see the vehicle, many of us get confused. Follow the laws for your state. Predict and these basic steps.



- Stay alert and keep the noise level low in your car so you can hear a siren.
- Check your rear-view mirrors on both sides of your vehicle to see how fast the emergency vehicle is traveling and plan your move.
- React quickly and calmly. Brake in all directions before pulling over. Use your turn signal or, if you don't have one, hand signals.
- Pull off to the right side of the road safely and gradually. Brake to prevent losing control.
- Before re-entering the road, look in all directions, use your signal and gradually merge back into the traffic.
- Never stop low or in the path of an emergency vehicle.

MOVE OVER LAW

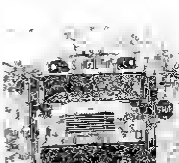
Currently, 49 states have a move over law in place. It applies to fire, police and ambulances parked on the side of the roadway with their emergency beacon lights flashing.

- If you approach such a vehicle you must move over into a side-by-side lane and if on a multi-lane road, move over to the left as a safe distance from the emergency vehicle.

In several states the law applies to tow trucks. The Department of Transportation will work with emergency responders to ensure

SCHOOL BUSES

School buses mean children are or may be near. The children do not always use good judgment when getting on or off a bus. Here are the safest actions to take when approaching a school bus:



- Reduce your speed.
- Expect children to appear out of nowhere.
- Cover the brake.
- Remember if the amber lights on the bus are flashing, the bus is about to stop.
- Stop if the red lights are flashing and the stop arm is deployed. The bus is stopping or is stopped.
- Do not pass a school bus with flashing red lights or an extended stop arm.

State laws vary on which vehicles must stop for stopped school buses on divided roadways. Please check with your state and local government's for the most applicable statute in your area.

Be alert for drivers who do not adhere to these stop schedules!

#1 Sunscreen Pill Could Be Available Soon (1st September 2011)

Scientists say they are close to producing a pill that would protect us from the sun's harmful ultraviolet (UV) rays. Researchers have located the chemicals coral uses to protect itself and can use these to produce a synthetic sun-shield compound. A sunscreen pill could be available by the year 2016. This is good news for sun-lovers as they would only need to take a pill once a week instead of slapping sunscreen on every few hours. A sunbather on Sydney's Bondi Beach welcomed this news, saying: 'Bring it on. No more sunscreen. No more sunburn. Now we can stay out in the sun all day long.' However, some scientists warned the pill could be harmful as too much sun protection can lead to vitamin D deficiency, resulting in weak bones.

The research team analysed coral samples from Australia's Great Barrier Reef to find out how coral can survive under the sun without suffering any damage. They discovered that algae provide the coral with the chemicals it needs to shield itself from UV rays. Lead scientist Dr Paul Long said: 'What we have found is that the algae living within the coral makes a compound that we think is transported to the coral, which then modifies it into a sunscreen for the benefit of both the coral and the algae.' He added: 'If we can determine how this compound is created and passed on, we could biosynthetically develop it in a laboratory to create a sunscreen for human use.' He said testing on humans could take place in the next two years.

Will you be buying the pills when they become available?

Would you agree to be tested?

Do you think we can end all disease and pain if we unlock nature's secrets?

What other features of nature would you like scientists to allow us to have?

Do you think synthetic medicines are better than natural ones?

How do we know if the sunscreen pills are 100% safe?

FROM Juan Sanchez

Hi!

This is a test fax! So lets talk business! I would like 7 of the thing you supply! Good day Sir!

— Juan Sanchez

Welcome to

Windows® Fax and Scan

One place to scan and fax your documents

FAX: You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer has an external modem, connect the phone line to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax**.

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN: After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started:

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, at the bottom of the left pane, click **Scan**.

3. On the toolbar, click **New Scan**.

4. Choose the scanning options you want to use, and then you're ready to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scanned items. For more help with scanning, click the **Help** button on the toolbar.

BACK

At present, a request for density output cards in a densitometre computations run yields density cards corresponding to densitometer densities If the test code used involves E N D conversions the density output cards must be run through a separate conversion program to correspond ... plotted ... corresponding to individual strips are punched, wh ... desired

I prop ... ty card output is requested, plotted densities are punched out In the normal case these would simply be the average densities If the test code calls for E N D conversion, it would be the E N D densities that are punched out If the test breaks down e.g because of range check failure we would get cards punched out for individual strips since individuals are plotted in that case

I would appreciate your comments on this proposal by January 2, 1971

To: DAVIS DANG

Here are the diagnostic results from the "Calculus Readiness Test", CR40A97, that you have recently taken. Your Score, the Critical Level, and the Total Possible score for each topic are reported below. The Critical Level for each topic is what MDTP considers to be the minimum number of correct responses for you to show adequate preparation in that topic.

	Your Score	Critical Level	Total Possible
Congratulations! Your results indicate that you have done well in each of the following topics:			
Exponents and Radicals	3	3	4
Functions	5	3	5
Geometric Applications	6	4	6
Linear Equations and Inequalities, Absolute Values, and their Graphs	6	5	7
Logarithmic and Exponential Functions	3	3	4
Polynomials and Polynomial Functions	3	3	4
Rational Expressions and their Graphs	4	4	5
Trigonometry	4	3	5

Your total score is 34 out of 40, which is 85%. We hope you find this information helpful. Please contact your teacher for specific activities and assignments that will aid in any necessary review.

I think you're confusing hair metal with glam rock Glam rock died out in the mid 70's

As for 88 91 being dead for rock

Dire Straits

RHCP

White Zombie

Suicidal Tendencies

MMTDM

NIN (Both Pretty Little Hate Machine and Head Like a Hole were released during this period)

Cowboy Junkies

Primus

The Offspring

The Dead Milkmen

Pop Will Eat Itself

Matthew Sweet

Butthole Surfers

GWAR

Jane's Addiction

Let's see

Peter Murphy was still putting out albums

Rush put out several albums

The Greatful Dead were still releasing albums

Well Ice T formed Bodycount in 1990

Rage Against the Machine formed in 1991

Beastie Boys started to slip back into their punk roots to create a rock/rap fusion with Check Your Head and cemented the sound in '93's Ill Communication

Are you talking about what was played on the radio where you lived, or what was actually released, or what was worth listening? These things do not always align

Thanks for selecting INNsight.com as your partner

On the Insert tab, the galleries include items that are designed to coordinate with the overall look of your document. You can use these galleries to insert tables, headers, footers, lists, cover pages, and other document building blocks. When you create pictures, charts, or diagrams, they also coordinate with your current document look.

You can easily change the formatting of selected text in the document text by choosing a look for the selected text from the Quick Styles gallery on the Home tab. You can also format text directly by using the other controls on the Home tab. Most controls offer a choice of using the look from the current theme or using a format that you specify directly.

To change the overall look of your document, choose new Theme elements on the Page Layout tab. To change the looks available in the Quick Style gallery, use the Change Current Quick Style Set command. Both the Themes gallery and the Quick Styles gallery provide reset commands so that you can always restore the look of your document to the original contained in your current template.
